Implementing the Transparency

Agenda Great Britain: Parliament: House of Commons: Committee of Public Accounts,2012-08 Whilst progress towards the Government's objectives for transparency is recognised there are areas where further work needs to be done It does not help government to meet the objectives of the transparency agenda when large quantities of raw data are released without ensuring that the data are fit for purpose Some data are very difficult to interpret and some is not being presented on a consistent basis for example in local government Poor or incomplete data hinders the ability of users to exercise effective choice and undermines the ability of service deliverers and policy makers to focus on improving quality The Government has not yet developed a full understanding of costs and benefits of making information transparent and so decisions on what data to make available and in what form are not yet guided by value for money considerations The Cabinet Office says the Open Data Institute will establish a fuller evidence base on the economic and public service benefits of open data The push for release of more data has also thrown up new challenges which departments need to meet facilitated by strong leadership from the Cabinet Office These include questions on how to sustain interest in data after the initial launch for example crime maps how to ensure sufficient disclosure of information by private firms delivering government contracts vigilance over protecting personal privacy and how the benefits of data disclosure can be realised by those without internet access

Transparency in Assessment – Exploring the Influence of Explicit Assessment Criteria Anders Jönsson,Frans Prins,2019-04-03 In many schools and higher education institutions it has become common practice to share assessment criteria with students Sometimes it is required for accountability purposes at other times criteria are used as a means to communicate expectations to students However the idea that explicit assessment criteria should be shared with students has been contested On the one hand research has shown that explicit criteria may positively affect student performance reduce their anxiety as well as support students use of self regulated learning strategies On the other hand there are fears that explicit criteria may have a restraining influence on students learning as well as limiting their autonomy and creativity There are also indications of students becoming more performance oriented as opposed to learning oriented when being provided with explicit assessment criteria Taken together it is not fully understood under which circumstances it is productive for student learning to share explicit assessment criteria and under which circumstances it is not In particular empirical research on the proposed negative effects of sharing criteria with learners is limited and most fears voiced in the literature are based on individual experiences and anecdotal evidence In this book we therefore bring different perspectives on transparency in assessment together in order to further our understanding of how students are influenced by the use of explicit assessment criteria A deeper understanding of the influence of explicit assessment criteria on students understanding of criteria motivation and learning is equally imperative for future research and educational practice both of which need to go beyond individual opinions and convictions

heat equation with the crank nicolson method on matlab - Jun 13 2023

web mar 10 2022 i am trying to implement the crank nicolson method in matlab of this equation $\frac{du}{dt} = \frac{d^2u}{dx^2} f(x,t)$ $u(0,t) = u(1,t) = 0$ $u(x,0) = u_0(x)$ with $f(x,t) = 20 \exp(50x) \frac{1}{2} \sin(\frac{t}{2})$ also $f(x,t) = 0$ $x \in [0,1]$ $t \in [0,1]$ the boundary conditions are $u(0,x) = u(1,x) = 0$ here is my mathematical thinking of the form $a \sin(b \sin(2\pi f t))$
