Technical Challenges and Design Issues in

Bangla Language Processing Karim, M. A., Kaykobad, M., Murshed, M., 2013-04-30 Many take advantage of software and hardware accessibility in the English language. However, for non-native speakers, this inevitably becomes a problem, specifically for the complex Bangla language, which is not easily integrated into the world of technology. *Technical Challenges and Design Issues in Bangla Language Processing* addresses the difficulties as well as the overwhelming benefits associated with creating programs and devices that are accessible to the speakers of the Bangla language. Professionals, students, and researchers interested in expanding the fields of computing, information, and knowledge management and communication technologies in the non-English realm will benefit from this comprehensive collection of research.

Data Science and Big

Data Analytics Durgesh Mishra, Xin She Yang, Aynur Unal, Dharm Singh Jat, 2024-03-16 This book features high quality research papers presented at the Third International Conference on Data Science and Big Data Analytics IDBA 2023 organized by Sri Aurobindo Institute of Technology Indore, India, in association with ACM and IEEE Computer Society in hybrid mode during June 16-17, 2023. This book discusses the topics such as data science, artificial intelligence, machine learning, quantum computing, big data, and cloud security, computation security, big data security, information security, forecasting, data analytics, mathematics for data science, graph theory, and application in data science, data visualization, computer vision, and analytics for social networks.

Innovative Data Communication Technologies and Application

Jennifer S. Raj, Khaled Kamel, Pavel Lafata, 2022-02-24 This book presents the latest research in the fields of computational intelligence, ubiquitous computing, models, communication intelligence, communication security, machine learning, informatics, mobile computing, cloud computing, and big data analytics. The best selected papers presented at the International Conference on Innovative Data Communication Technologies and Application ICIDCA 2021 are included in the book. The book focuses on the theory, design, analysis, implementation, and application of distributed systems and networks.

Information Systems for Indian Languages Chandan Singh, Gurpreet Singh Lehal, Jyotsna Sengupta, Dharam Veer Sharma, Vishal Goyal, 2011-02-11 This book constitutes the refereed proceedings of the International Conference on Information Systems for Indian Languages ICISIL 2011 held in Patiala, India, in March 2011. The 63 revised papers presented were carefully reviewed and selected from 126 paper submissions, full papers, as well as poster papers and 25 demo submissions. The papers address all current aspects on localization, e-governance, Web content accessibility, search engine, and information retrieval systems, online and offline OCR, handwriting recognition, machine translation, and transliteration, and text-to-speech and speech recognition, all with a particular focus on Indic scripts and languages.

Smart Intelligent Computing and Communication Technology V.D. Ambeth Kumar, S. Malathi, Valentina Emilia Balas, Margarita Favorskaya, Thinagaran Perumal, 2021-10-15 Recent developments in the fields of intelligent computing and communication have paved the way for the handling of current and upcoming problems and brought about significant technological advancements This book presents the proceedings of IConIC 2021 the 4th International Conference on Intelligent Computing held on 26 and 27 March 2021 in Chennai India The principle objective of the annual IConIC conference is to provide an international scientific forum where participants can exchange innovative ideas in relevant fields and interact in depth through discussion with their peer group The theme of the 2021 conference and this book is Smart Intelligent Computing and Communication Technology and the 109 papers included here focus on the technological innovations and trendsetting initiatives in medicine industry

education and security that are improving and optimizing business and technical processes and enabling inclusive growth. The papers are grouped under 2 headings: Evolution of Computing Intelligence and Computing and Communication, and cover a broad range of intelligent computing research and applications. The book provides an overview of the cutting edge developments and emerging areas of study in the technological fields of intelligent computing and will be of interest to researchers and practitioners from both academia and industry.

Advances in Electrical and Computer Technologies

Thangaprakash Sengodan, M. Murugappan, Sanjay Misra, 2021-02-26. This book comprises select proceedings of the International Conference on Advances in Electrical and Computer Technologies 2020 (ICAECT 2020). The papers presented in this book are peer reviewed and cover latest research in electrical electronics communication and computer engineering. Topics covered include smart grids, soft computing techniques in power systems, smart energy management systems, power electronics, feedback control systems, biomedical engineering, geo-informative systems, grid computing, data mining, image and signal processing, video processing, computer vision, pattern recognition, cloud computing, pervasive computing, intelligent systems, artificial intelligence, neural network and fuzzy logic, broad band communication, mobile and optical communication, network security, VLSI embedded systems, optical networks and wireless communication. The volume can be useful for students and researchers working in the different overlapping areas of electrical electronics and communication engineering.

Research Perspectives on Software Engineering and Systems Design

Radek Silhavy, Petr Silhavy, 2025-08-31. This book combines cutting edge research addressing current challenges and emerging opportunities in computing, artificial intelligence, sustainability and education. Through interdisciplinary insights, readers will discover novel computational frameworks designed to enhance cybersecurity, optimise energy systems and advance interactive technologies such as chatbots, virtual reality and gaming for medical rehabilitation. Each chapter demonstrates innovative methodologies from advanced AI-driven complex data analyses to sophisticated mathematical models addressing real world problems. The studies highlight how data science, machine learning and computational intelligence can boost organisational efficiency, support sustainable development and significantly enhance human computer interaction. Ideal for researchers, industry experts, educators and advanced students, this resource provides valuable perspectives on practical applications and theoretical advancements essential for staying ahead in rapidly evolving technological fields.

Third International Conference on Image Processing and Capsule Networks. Joy Long-Zong Chen, João Manuel R. S. Tavares, Fuqian Shi, 2022-07-28. This book provides a collection of the state of the art research attempts to tackle the challenges in image and signal processing from various novel and potential research perspectives. The book investigates feature extraction techniques, image enhancement methods, reconstruction models, object detection methods, recommendation models, deep and temporal feature analysis, intelligent decision support systems and autonomous image detection models. In addition to this, the book also looks into the potential opportunities to monitor and control the global pandemic situations. Image processing technology has progressed

significantly in recent years and it has been commercialized worldwide to provide superior performance with enhanced computer machine vision video processing and pattern recognition capabilities Meanwhile machine learning systems like CNN and CapsNet get popular to provide better model hierarchical relationships and attempts to more closely mimic biological neural organization As machine learning systems prosper image processing and machine learning techniques will be tightly intertwined and continuously promote each other in real world settings Adopting this trend however the image processing researchers are faced with few image reconstruction analysis and segmentation challenges On the application side the orientation of the image features and noise removal has become a huge burden
