The proceedings of the seminar will contain papers from representatives from many countries to address current technological issues and discuss engineering development and operating experiences. The proceedings will therefore greatly benefit those who wish to learn about the new developments in the areas of application of pressure vessels and piping technology.

Manufacturing Techniques for Materials T.S. Srivatsan, T.S. Sudarshan, K. Manigandan, 2018-04-09. *Manufacturing Techniques for Materials* Engineering and Engineered provides a cohesive and comprehensive overview of the following: i) prevailing and emerging trends; ii) emerging developments and related technology; and iii) potential for the commercialization of techniques specific to manufacturing of materials. The first half of the book provides the interested reader with detailed chapters specific to the manufacturing of emerging materials such as additive manufacturing, with a valued emphasis on the science, technology and potentially viable practices specific to the manufacturing technique used. This section also attempts to discuss in a lucid and easily understandable manner the specific advantages and limitations of each technique and goes on to highlight all of the potentially viable and emerging technological applications. The second half of this archival volume focuses on a wide spectrum of conventional techniques currently available and being used in the manufacturing of both materials and resultant products. *Manufacturing Techniques for*
