

FANUC Robot ARC Mate 0iA

Features

The FANUC ARC Mate 0iA Robot is an extremely lightweight and compact robot, specifically designed for arc welding applications. The ARC Mate 0iA will work for a wide variety of arc welding applications, including smaller parts that are normally done with manual welding.

- The lightweight and compact arm design of ARC Mate 0iA provides a highly reliable package that is optimized for arc welding applications.
- The latest servo technology provides high-speed and accuracy of the robot motion and minimizes the interaction of the operator to increase the efficiency of the arc welding system.
- Digital communication between the latest Lincoln Arc Welding Power Supply and the ARC Mate 0iA provides superior control and performance, creating (or delivering) the highest quality weld.
- Various welding waveforms such as thin metal spatter-less welding and highly-controlled pulse welding can be applied to almost any application for an optimized weld.

Robotic Welding, Intelligence and Automation Tzyh-Jong Tarn, Shan-Ben Chen, Xiao-Qi Chen, 2015-07-15 The primary aim of this volume is to provide researchers and engineers from both academic and industry with up to date coverage of new results in the field of robotic welding intelligent systems and automation The book is mainly based on papers selected from the 2014 International Conference on Robotic Welding Intelligence and Automation RWIA 2014 held Oct 25 27 2014 at Shanghai China The articles show that the intelligentized welding manufacturing IWM is becoming an inevitable trend with the intelligentized robotic welding as the key technology The volume is divided into four logical parts Intelligent Techniques for Robotic Welding Sensing of Arc Welding Processing Modeling and Intelligent Control of Welding Processing as well as Intelligent Control and its Applications in Engineering

Introduction to Robotics in CIM Systems James A. Rehg, 2003 Written from a manufacturing perspective this book takes readers step by step through the theory and application techniques of designing and building a robot driven automated work cell from selection of hardware through programming of the devices to economic justification of the project All inclusive in approach it covers not only robot automation but all the other technology needed in the automated work cell to integrate the robot with the work environment and with the enterprise data base Robot and other required automation hardware and software are introduced in the order in which they would be selected in an actual industrial automation design Includes system troubleshooting guides case studies problems and worked example problems Robot Classification Automated Work Cells and CIM Systems End of Arm Tooling Automation Sensors Work Cell Support Systems Robot and System Integration Work Cell Programming Justification and Applications of Work Cells Safety Human Interface Operator Training Acceptance and Problems For those interested in Robotics and Manufacturing Automation or Production Design

in Japan J. Hartley,2013-04-09 Much has been said and written about Japan's manufacturing prowess Most of the comment comes from people who are merely visitors to the country and can be best classified as observers looking in from the outside Other views come from the Japanese themselves in which the double barrier of culture and language filters out much information that would be of real value to Western industrialists Neither of these limitations apply to John Hartley who has been resident in Japan for the past five years He understands the culture can speak the language and has extensive contacts at the highest level Therefore he is in a unique position to report on the Japanese scene and its activities in advanced manufacturing technology This he has been doing on a regular basis to IFS magazines The Industrial Robot Assembly Automation Sensor Review and The FMS Magazine Most of the material in this book is from John Hartley's pen and represents his most significant contributions on flexible automation in Japan to these journals over the last three years It is augmented with a few other articles written by leading authorities on new technology in Japanese manufacturing industry
