experiment with many forms of transgressive desire Castiglione and Ariosto provide the perfect arena for problematizing the Italian Renaissance discourses on gender and sexual difference on the production of pleasure and theories of selfhood and on the body and modes of spectatorship The author argues that women are indispensable to Castiglione's conversation on the courtier and the court lady not because as is often contended he was sympathetic toward women but because he found women useful for their central role in the male construction of men's own image As for Ariosto he resolves his narrative by subsuming women to culture and society thus sealing out disorder Although at times portraying female rebellion and resentment as empowering in the end he punishes women displaying these qualities by banishing them from the text In contrast he celebrates the acquiescent woman in the figure of the lady warrior Bradamante who upon resuming a properly feminine role becomes the progenitrix of a dynasty The Italian Renaissance discourse on women cast them in both assertive and docile roles In the end however they were restrained or expelled their society could envision a freer order for men but not for women
