intensity defined as global total energy supply per unit of GDP improved from 5 6 megajoules per dollar 2017 purchasing power parity in 2010 to 4 7 megajoules in 2019 However the rate of improvement 1 6% per year on average since 2015 falls short of the 3 2% annual rate needed to reach Sustainable Development Goal 7 3 International financial flows to support clean and renewable energy in developing countries reached 10 9 billion in 2019 a 23 6% decrease from 2018 This decline occurred even before the onset of the COVID 19 pandemic Over a longer five year moving average average annual commitments decreased for the first time since 2008 from 17 5 billion in 2014 18 to 16 6 billion in 2015 19 Although developing countries achieved a record of 245 7 watts per capita in installed renewable energy generating capacity in 2020 small island developing States least developed countries and landlocked developing countries have lagged behind It would take least developed countries and landlocked developing country in 2020 The 2023 SEDRC conference titled Sustainable Development and Education aims to redefine the understanding of research in the continent s development and the role of researchers The conference focusses on applied research discussions and its dissemination Researchers from research institutions academicians postgraduate students politicians and industry representatives will be the primary audience for the conference proceedings
