**Validity and Limitations of College Student Self-Report Data** Serge Herzog,Nicholas A. Bowman,2011-06-28 Critics of student self reported data claim that the accumulated corpus of research documenting student learning on the basis of survey responses stands on shaky ground This volume argues that scholarship on proper use of student self report data is woefully underdeveloped and contributing authors offer several important insights to assist IR practitioners in identifying potential limitations associated with self report data Volume editors Serge Herzog director of institutional analysis at the University of Nevada Reno and Nicholas A Bowman postdoctoral research associate in the Center for Social Concerns at the University of Notre Dame have assembled contributing authors who are leading scholars in the field of college student self reports Combined the chapters draw on data from a mix of colleges and universities capturing student growth at different stages of the undergraduate experience and even beyond graduation This is the 150th volume of the Jossey Bass quarterly report series New Directions for Institutional Research Always timely and comprehensive New Directions for Institutional Research provides planners and administrators in all types of academic institutions with guidelines in such areas as resource coordination information analysis program evaluation and institutional management

Organizational Psychology Steve M. Jex,2002-11-08 A comprehensive treatment of the science and practice of organizational psychology Following a scientist practitioner model Organizational Psychology explores the practical implications of the current research in the field expertly integrating multicultural and international issues Beginning with a foundation of research methodology author Steve Jex examines the behavior of individuals in organizational settings Drawing on his experiences as a consultant and educator he uses actual cases to illustrate workplace issues offering balanced coverage of such key topics as occupational stress motivation and corporate culture Also presented is unique information on research methods and the use of statistics in understanding organizations With an emphasis on applying theory and research in practice Jex explores the mechanisms that organizations use to influence employees behavior addressing the major motivation theories in organizational psychology Readers will discover how psychological models can be used to improve employee morale productivity and quality of service The focus then shifts from the individual to the group level an important distinction given the increased reliance on teams in many organizations Jex identifies the factors that have the greatest

impact on group effectiveness and examines the dynamics underlying intergroup behavior Finally he moves to the organization macro level revealing a variety of ways in which organizations engage in planned change with the assistance of behavioral science knowledge

The Science of Self-report Arthur A. Stone,Christine A. Bachrach,Jared B. Jobe,Howard S. Kurtzman, Virginia S. Krueger,2009-12-09 Bringing together leading investigators this comprehensive handbook is a one stop reference for anyone planning or conducting research on personality It provides up to date analyses of the rich array of methodological tools available today giving particular attention to real world theoretical and logistical challenges and how to overcome them In chapters filled with detailed practical examples readers are shown step by step how to formulate a suitable research design select and use high quality measures and manage the complexities of data analysis and interpretation Coverage ranges from classic methods like self report inventories and observational procedures to such recent innovations as neuroimaging and genetic analyses

**Assessing Well-Being** Ed Diener,2009-06-04 The Sandvik Diener and Seidlitz 1993 paper is another that has received widespread attention because it documented the fact that self report well being scales correlate with a number of other methods of measuring the same concepts such as with reports by knowledgeable informants family and friends experience sampling measurement and the memory for good versus bad life events A single factor was found to underlie measures using different methods and a number of different well being self report measures were found to correlate with the non self report measures Thus although the self report measures of well being are imperfect and can be influenced by response artifacts they have substantial validity as shown by their correlations with measurements based on alternative methods Whereas the Pavot and Diener article reviewed the Satisfaction with Life Scale the Lucas Diener and Larsen 2003 paper reviews various approaches to assessing positive emotions As we wrote in the chapter in this volume in which we present new measures we do not consider any of the existing measures of positive affect to be entirely acceptable for measuring subjective well being in the affect area and that is why we have created and validated a new measure

### **Statistical and Methodological Myths and Urban Legends**

Charles E. Lance, Charles E. Lance, Robert J. Vandenberg, 2010-10-18 This book provides an up to date review of commonly undertaken methodological and statistical practices that are sustained in part upon sound rationale and justification and in part upon unfounded lore. Some examples of these methodological urban legends as we refer to them in this book are characterized by manuscript critiques such as a your self report measures suffer from common method bias b your item to subject ratios are too low c you can't generalize these findings to the real world or d your effect sizes are too low. Historically there is a kernel of truth to most of these legends but in many cases that truth has been long forgotten, ignored or embellished beyond recognition. This book examines several such legends. Each chapter is organized to address a what the legend is that we almost all know to be true b what the kernel of truth is to each legend c what the myths are that have developed around this kernel of truth and d what the state of the practice should be. This book meets an important need for the accumulation and integration of these methodological and statistical practices.
