Call to Ambulance Service – non-injury calls are relegated as low priority

Delayed responses can exacerbate these injuries and present secondary negative impacts for a patient

Avoiding unnecessary conveyance to hospital helps to avoid unnecessary admissions

These calls may come from:-

Health and Social Care professionals on finding the client on the floor

Care Agencies

LifeLine Companies

Nursing and Residential Care Homes

Family

Members of the Public

Often there is no further referral on or assessment of cause and prevention

This means falls will make up an even greater proportion of calls made to the ambulance service, placing a greater strain on frontline resources and staff. In addition to this, obesity levels in the UK are increasing
