Financial Reporting and Corporate Governance Thomas A. Lee,2007-04-02 The aim of Financial Reporting and Corporate
Governance is to give non accounting students a basic ability and confidence to read and use financial accounting reports
and statements within their business or financial specialties Many employees in business today are expected to be conversant
with reported accounting information as part of their regular job responsibilities However they often have little formal
training in using such information This book is intended as a core textbook for non accounting students who need some
understanding of accounting The students can be majoring in business either as undergraduates or graduates or in non
business areas such as engineering law and media The theme of the book is financial reporting as an essential and significant
part of corporate governance The book can be used as a self contained text to support a specific course or module However it
is designed so that it can be built on in more advanced courses on the subject For this reason it may be used by specialist
accounting students in introductory courses
