## 1 Introduction

There will always be a need for maintenance on mechanical systems and components because of friction and wear. It is however not always as simplistic as "if it breaks, repair it" and in recent years the need for scientific maintenance has increased tremendously. Reasons for this could be the increased sophistication of production equipment, the need for a high return on an investment and the high cost of maintenance.

The objective of an organization's maintenance activities should be to support the production process with maximal levels of availability, reliability, operability and safety at acceptable cost. If this objective is pursued the results will be clearly evident in the form of increased production capacity and thus company profit. As high profit is the reason for the existence of production concerns, maintenance should be regarded in a very serious way.

Various maintenance models exist to act as guidelines for an effective maintenance function. One such model called 'The Maintenance Cycle' is proposed by Coetsee[22] and act as a good overview of the total complicated maintenance function. See Figure 1.1, on the next page.

The maintenance cycle is divided into two orbits namely: (1) The outer cycle which represents the managerial processes in the maintenance organization; and (2) The inner cycle which involves the operational and technical processes. In this dissertation we will focus on maintenance strategy setting, one of the components in the inner cycle.

*RESEARCH PROPOSAL: CRAFTING WITH AI AWARENESS* Samad Sepasgozar, 2024-09-09 Academic proposals have clear communication and standardized formatting in most fields while creative presentations might be acceptable in design or artistic fields. Imagine your research proposal including a novel concept buried under flashy fonts, diverse colors, and confusing graphics, resulting in losing the key message in a visual cacophony. This chapter guides you through crafting a proposal with clear information that resonates with scientific norms, ensuring clarity and coherence from the cover to the conclusion. We'll explore font choices, graphic elements, and formatting with a clear structure to elevate your message without distracting from its core excellence. A plain, well-structured research proposal should highlight the research rigor, not the visual effects.

It should be noted that the quality in research articles comes from the extensive planning and in-depth research before starting writing them. This is true even for management research papers. Writing a research paper analyzes a perspective or argues a point. Regardless of the type of research paper the researcher is writing, the researcher should present his own thinking backed up by others' ideas and information. Research paper as a result of the research in the teaching of writing discussions with colleagues and own experiences. We have developed a detailed approach to writing research papers, and the approach is presented here. Instead of focusing on one research paper, we have focused on the process of research writing through a series of shorter writing exercises. Students begin by having to carefully think about a topic of research and by developing a working idea. They then write a series of shorter essays that explore that topic. All along the way, students are continuing to research and revise their working proposal so that by the end of the term, their thinking about their original topic of research has evolved.
