Science Interrupted Timothy G. McLellan,2024-01-15 Science Interrupted examines how scientists in China pursue environmental sustainability within the constraints of domestic and international bureaucracies Timothy G McLellan offers a theoretical framework for analyzing the formal procedural work of Chinese bureaucracy work that is overlooked when China scholars restrict their gaze to the informal and interpersonal channels through which bureaucracy is often navigated Homing in on an agroforestry research organization in southwest China the author takes the experiences of the organization s staff in navigating diverse international funding regimes and authoritarian state institutions as entry points for understanding the pervasiveness of bureaucracy in contemporary science He asks What if we take the tools sensibilities and practices of bureaucracies seriously not only as objects of critique but as resources for re thinking scientific practice Extending a mode of anthropological research in which ethnography serves as source of theory as well as source of data Science Interrupted thinks with and not only against bureaucracy McLellan shows that ethnographic engagement with bureaucracy enables us to imagine more democratic and more collaborative modes of scientific practice **Border Criminologies from the**

Periphery José A. Brandariz, Giulia Fabini, Cristina Fernández-Bessa, Valeria Ferraris,2025-02-04 This book contributes to and broadens the field of Border Criminology by bringing together a collection of chapters from leading scholars engaged in cross national and comparative conversations on bordered penalty and crimmigration practices with a specific focus on research conducted in places that may be considered peripheral and semi peripheral jurisdictions It builds not only on global criminological debates but also on southern criminological concerns thereby enriching border criminology conversations by expanding the epistemological boundaries of these academic debates It asks a variety of questions What is the part being played by detention practices at the national level and how is it changing over time To what extent are deportation policies playing a significant role in the coercive management of unwanted noncitizens Is the criminal justice system and more precisely the prison system crucially supplementing the immigration enforcement apparatus in handling undocumented noncitizen groups Should that be the case is the increasing criminalization of noncitizens leading to the consolidation of a dual criminal justice system It is essential reading for those engaged in Border Criminology Southern Criminology and Comparative Criminal Justice **Advances in the Molecular Biology of Trypanosomatid Pathogens** Gustavo

Benaim,Alberto Enrique Paniz Mondolfi,Juan David Ramírez,Emilia Mia Sordillo,2021-12-01 **Global Health and Geographical Imaginaries** Clare Herrick,David Reubi,2017-03-16 To date geography has not yet carved out a disciplinary niche within the diffuse domain that constitutes global health However the compulsion to do and understand global health emerges largely from contexts that geography has long engaged with urbanisation globalisation political economy risk vulnerability lifestyles geopolitics culture governance development and the environment Moreover global health brings with it an innate powerful and politicising spatial logic that is only now starting to emerge as an object of enquiry This book aims to draw attention to and showcase the wealth of existing and emergent geographical contributions to what has recently been termed critical global health studies Geographical perspectives this collection argues are essential to bringing new and critical perspectives to bear on the inherent complexities and interconnectedness of global health problems and purported solutions Thus rather than rehearsing the frequent critique that global health is more a set of problems than a coherent disciplinary approach to ameliorating the health of all and redressing global bio inequalities this collection seeks to explore what these problems might represent and the geographical imaginaries inherent in their constitution This unique volume of geographical writings on global health not only deepens social scientific engagements with health itself but in so doing brings forth a series of new conceptual methodological and empirical contributions to social scientific multidisciplinary scholarship Policing and Boundaries in a Violent Society Guy Lamb,2022-01-31 This book explores how social and territorial boundaries have influenced the approaches and practices of the South Africa Police Service SAPS By means of a historical analysis of South Africa this book introduces a new concept police frontierism which illuminates the nature of the relationships between the police policing and boundaries and can potentially be used for future case study research Drawing on a wealth of research this book examines how social and territorial boundaries strongly influenced police practices and behaviour in South Africa and how social delineations amplify and distort existing police prejudices against those communities on the other side of the boundary Focusing on cases of high density police operations public order policing and the recent policing of the COVID 19 lockdown this book argues that poor economic conditions combined with an increased militarisation of the SAPS and a decline in public trust in the police will result in boundaries continuing to fundamentally inform police work in South Africa This book will be of interest to scholars and students interested in policing in post colonial societies characterised by high levels of violence as well as police work and police militarization **The South African Response to COVID-19** Pieter Fourie,Guy Lamb,2023-03-28 This book analyses the first two years of South Africa s response to the COVID 19 epidemic from its emergence in early 2020 Drawing on the perspectives of a range of public health experts economists and other social scientists and development practitioners this book argues that understanding this early response will be essential to moderate and improve future policy thinking around health governance and epidemic readiness This book provides a systemic analysis of not only the epidemiological progression of COVID 19 in South Africa but also the

socio political factors that will be key in determining the future of the country as a whole including health system challenges socio economic disparities and inequalities and variable often contradictory and tardy policy responses Overall this book exposes Manichean thinking and the spurious policy dichotomies that pitch public health against human rights economic recovery against viral vector control and science against ideology with lessons not just for South Africa but also for elsewhere on the African continent and beyond This book will be perfect for researchers and practitioners across Public Health Health Policy and Global Health as well as those with an interest in South African politics and development more generally The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4 0 license

The Truth about Crime Jean Comaroff, John L. Comaroff, 2016-12-05 In this book renowned anthropologists Jean and John L Comaroff make a startling but absolutely convincing claim about our modern era it is not by our arts our politics or our science that we understand ourselves it is by our crimes Surveying an astonishing range of forms of crime and policing from petty thefts to the multibillion dollar scams of too big to fail financial institutions to the collateral damage of war they take readers into the disorder of the late modern world Looking at recent transformations in the triangulation of capital the state and governance that have led to an era where crime and policing are ever more complicit they offer a powerful meditation on the new forms of sovereignty citizenship class race law and political economy of representation that have arisen To do so the Comaroffs draw on their vast knowledge of South Africa especially and its struggle to build a democracy founded on the rule of law out of the wreckage of long years of violence and oppression There they explore everything from the fascination with the supernatural in policing to the extreme measures people take to prevent home invasion drawing illuminating comparisons to the United States and United Kingdom Going beyond South

Africa they offer a global criminal anthropology that attests to criminality as the constitutive fact of contemporary life the vernacular by which politics are conducted moral panics voiced and populations ruled The result is a disturbing but necessary portrait of the modern era one that asks critical new questions about how we see ourselves how we think about morality and how we are going to proceed as a global society Replicating & Reproducing Policing Research Khadija Monk,Jacek Koziarski,2024-04-30 This book addresses the need for policing scholarship to strengthen its empirical cumulative knowledge base by replicating and reproducing earlier studies The chapters in this volume advance policing research by replicating and reproducing earlier studies investigating the generalizability of research findings and making data and research methods available to other researchers to encourage scientific exploration of previous research findings Each chapter addresses important scientific goals of validity reliability and generalizability which build our cumulative knowledge of what is known in policing research ultimately informing policymaking The book offers insights into why replicating and reproducing policing scholarship is critical from emphasizing the importance of making data and study material publicly available to facilitate replications and reproductions to reproducing studies in new contexts and cautioning against making policy making decisions based on studies that have not been replicated This volume highlights the immense value in shifting researchers priorities even slightly to focus less so on originality and innovation to make room for replications and reproductions thereby shedding light on how true empirical knowledge on policing and police practice is dependent on it This book was originally published as a special issue of Police Practice and Research International Development Bruce Currie-Alder,Ravi Kanbur,David M. Malone,Rohinton Medhora,2014-02-27 Thinking on development informs and inspires the actions of people organizations and states in their continuous effort to invent a better world This volume examines the ideas behind development their origins how they have changed and spread over time and how they may evolve over the coming decades It also examines how the real life experiences of different countries and organizations have been inspired by and contributed to thinking on development The extent to which development works depends in part on particular local historical or institutional contexts General policy prescriptions fail when the necessary conditions that make them work are either absent ignored or poorly understood There is a need to grasp how people understand their own development experience If the countries of the world are varied in every way from their initial conditions to the degree of their openness to outside money and influence and success is not centred in any one group it stands to reason that there cannot be a single recipe for development Each chapter provides an analytical survey of thinking about development that highlights debates and takes into account critical perspectives It includes contributions from scholars and practitioners from the global North and the global South spanning at least two generations and multiple disciplines It will be a key reference on the concepts and theories of development their origins evolution and trajectories and act as a resource for scholars graduate students and practitioners *Faith-Based Organizations in Development Discourses and Practice* Jens Koehrsen,Andreas

Heuser,2019-11-28 Exploring faith based organizations FBOs in current developmental discourses and practice this book presents a selection of empirical in depth case studies of Christian FBOs and assesses the vital role credited to FBOs in current discourses on development Examining the engagement of FBOs with contemporary politics of development the contributions stress the agency of FBOs in diverse contexts of development policy both local and global It is emphasised that FBOs constitute boundary agents and developmental entrepreneurs they move between different discursive fields such as national and international development discourses theological discourses and their specific religious constituencies By combining influxes from these different contexts FBOs generate unique perspectives on development they express alternative views on development and stress particular approaches anchored in their theological social ethics This book should be of interest to those researching FBOs and their interaction with international organizations and to scholars working in the broader areas of religion and politics and politics and development **Innovating in a Secret World** Tina P.
