Neoliberalism Economic Policy and the Collapse of the Public Sector Lionel D. Lyles PhD.,2018-07-13 My book demonstrates how classical liberalism was the foundation upon which Thomas Jefferson George Washington Alexander Hamilton and others wrote the Declaration of Independence Constitution and the Bills of Rights however it was rolled back by 1980 and replaced with neoliberalism which was championed by the Reagan Administration In short this ideology has one main aim and that is to shrink government cut the budgets of social programs and give away billions of taxpayer dollars to private business in the form of tax breaks During the Jindal administration and by the end of its first term more than 7 billion worth of tax breaks had been given away to private business A surplus of 1 billion left in the Louisiana treasury by outgoing governor Kathleen Blanco after Hurricane Katrina was given away by the end of the first two months of its first term Today the Louisiana legislature is currently facing a 650 million fiscal cliff and no doubt more budget cuts are in store for the Louisiana public sector

Oklahoma Teacher ,1920 *Turning the Page* Rachel Slaughter,2021-03-05 There is a dearth of multicultural literature in schools since few schools offer a curriculum that promotes multicultural education However by the year 2050 ethnic minority children will make up the majority of the United States public school classrooms Multicultural literature is the building block of a multicultural education which reflects our nation s diversity and helps all students learn by providing help to bridge the cultural gap and promote racial awareness

Teachers often find it difficult to identify or find quality multicultural literature that adheres to the standard curriculum. Turning the Page: The Ultimate Guide for Teachers to Multicultural Literature helps educators find and evaluate multicultural books that are suitable for the classroom and align with the standard curriculum. The book includes a peer-reviewed metric that shows teachers how to substitute biased books with multicultural literature that endorses the same themes. Second, the book includes reviews, lesson plans, and curated book lists of multicultural books. Finally, the book offers a stepwise plan on how to create a task force of school stakeholders who can implement a comprehensive multicultural program. In 2018, The National Association for Multicultural Education released standards for multicultural education to encourage school staff to become culturally competent and linguistically diverse. Turning the Page: The Ultimate Guide for Teachers to Multicultural Literature moves educators in that direction.

Archaeological Narratives of the North American Great Plains Sarah J. Trabert, Kacy L. Hollenback, 2021-08-12. Stretching from Canada to Texas and the foothills of the Rockies to the Mississippi River, the North American Great Plains have a complex and ancient history. The region has been home to Native peoples for at least 16,000 years. This volume is a synthesis of what is known about the Great Plains from an archaeological perspective but it also highlights Indigenous knowledge, viewpoints, and concerns for a more holistic understanding of both ancient and more recent pasts. Written for readers unfamiliar with archaeology in the region, the book in the SAA Press Current Perspectives Series emphasizes connections between past peoples and contemporary Indigenous nations, highlighting not only the history of the area but also new theoretical understandings that move beyond culture history. This overview illustrates the importance of the Plains in studies of exchange, migration, conflict, and sacred landscapes, as well as contact and colonialism in North America. In addition, the volume includes considerations of federal policies and legislation, as well as Indigenous social movements and protests over the last hundred years, so that archaeologists can better situate Indigenous heritage, contemporary Indigenous concerns, and lasting legacies of colonialism today.

New Methods and Theories for Analyzing Mississippian Imagery Bretton T. Giles, Shawn P. Lambert, 2021-10-19. Premiere paddler and Texas Canoe Racing Hall of Famer Bob Spain presents a thorough and personal guide to all aspects of canoeing. He opens with a brief history of canoes and canoe making in North America, followed by an illustrated how-to section on proper paddling technique and posture. Readers will learn how to hold a paddle, perform basic strokes, and improve their technique, as well as gain important information on the various types of canoes available. A handy checklist in the back of the book outlines important safety gear and essential equipment to pack in your canoe for day trips and overnight expeditions. Both newcomers to the sport and seasoned paddlers

will find Spain's detailed descriptions of his ten favorite inland and coastal Texas paddling trails entertaining and helpful. He provides useful logistical information such as launch and take out locations, GPS coordinates, available camping sites, and suggestions for nearby paddling trails. These trails offer paddlers a unique opportunity to explore the state and its varied wildlife while promoting the importance of preserving waterways. Spain concludes with a discussion on pressing conservation issues: water pollution, urban growth, habitat destruction, invasive species, and natural disasters, and the role ordinary people can have in protecting these natural resources for future generations. The Greater Plains tells a new story of a region stretching from the state of Texas to the province of Alberta, where the environments are as varied as the myriad ways people have inhabited them. These innovative essays document a complicated history of human interactions with a sometimes plentiful and sometimes foreboding landscape from the Native Americans who first shaped the prairies with fire to twentieth-century oil regimes whose pipelines linked the region to the world. The Greater Plains moves beyond the narrative of ecological desperation that too often defines the region in scholarly works and in popular imagination. Using the lenses of grasses, animals, water, and energy, the contributors reveal tales of human adaptation through technologies ranging from the travois to bookkeeping systems and hybrid wheat. Transnational in its focus and interdisciplinary in its scholarship, The Greater Plains brings together leading historians, geographers, anthropologists, and archaeologists to chronicle a past rich with paradoxical successes and failures, conflicts and cooperation, but also continual adaptation to the challenging and ever-shifting environmental conditions of the North American heartland. **Annual Report** Louisiana. Gods of Thunder Timothy R. Pauketat, 2023. A sweeping account of Medieval North America when Indigenous peoples confronted climate change. Few Americans today are aware of one of the most consequential periods in ancient North American history: the Medieval Warm Period of seven to twelve centuries ago (AD 800–1300 CE). On every page of this book, readers will be led down the same paths walked by Indigenous people a millennium ago, some trod by Spanish conquistadors just a few centuries later. The book will follow the footsteps of priests, pilgrims, traders, and farmers who took great journeys, made remarkable pilgrimages, and migrated long distances to new lands. Along the way, readers will discover a new history of

a continent that like today was being shaped by climate change or controlled by ancient gods of wind and water Through such elemental powers the history of Medieval America was a physical narrative a long term natural and cultural experience in which Native people were entwined long before Christopher Columbus arrived or Hernan Cortes conquered the Aztecs The book s dozen chapters cover a lot of ground focusing on some remarkable parallels between pre contact American civilizations separated by a thousand miles or more Key archaeological sites are featured in every chapter all of which link in an evidentiary trail a great religious movement that swept Mesoamerica the Southwest and the Mississippi valley sometimes because of worsening living conditions and sometimes by improved agricultural yields thanks to global warming a thousand years ago

Place, Race, and Identity Formation Ed Douglas McKnight, 2017-04-07 In this work of curriculum theory Ed Douglas McKnight addresses and explores the intersections between place with specific discussion of Kincheloe s and Pinar s conceptualization of place and identity and race specifically Winthrop Jordan s historical analysis of race as an Anglo European construction that became the foundation of a white mythos To that end he employs a form of narrative construction called curriculum vitae course of life a method of locating and delineating identity formation which addresses how theories of place race and identity formation play out in a particular concrete life By working through how place racializes identity and existence the author engages in a long Southern tradition of storytelling but in a way that turns it inside out Instead of telling his own story as a means to romanticize the sins of the southern past he tells a new story of growing up within the white discourse of the Deep South in the 1960s and 70s tracking how his racial identity was created and how it has followed him through life Significant in this narrative is how the discourse of whiteness and place continues to express itself even within the subject position of a curriculum theorist teaching in a large Deep South university The book concludes with an elaboration on the challenges of engaging in the necessary anti racist complicated conversation within education to begin to work through and cope with heavy racialized inheritances
