Shaklee, Supriya Baily, 2012-03-08 As countries become increasingly interdependent student populations in the United States are becoming more culturally diverse These students transnational perspectives present significant challenges to teachers but a disconnect exists between the skills teachers need and those provided to them by colleges of education As teacher preparation programs continue to cater to historic models of diversity the programs show a glaring lack of recognition for the recent changes in school and community populations Internationalizing Teacher Education in the United States examines the impact of globalization on teacher education in the United States explains the current barriers to teacher education becoming more internationally minded and presents possible solutions for teacher education programs to consider Other books address the multi national challenges faced by American education in the 21st century but this book takes it one step further offering teacher educators practical and theoretical explorations of their vital role in the education of contemporary student populations in the United States *The Power of Story* Joan Wink Ph.D., 2017-11-07 Through this book readers will discover that stories can move the human heart

and head in ways that research cannot. Stories bring together readers, writers, librarians, teachers, students and families in the libraries of today and will continue to do so tomorrow. Written for all those lovers of literacy, this book links libraries and literacies through the power of stories. The book is not filled with data in the form of pie charts, graphs and tables. Rather, the truth of the research is grounded in authentic stories that reflect not only the interpretation of data but also the transformative nature of literacies and libraries. The author's primary goal is that readers will come to value and use storytelling in their own professional and personal lives to explain and expand on complex concepts and to make information more accessible for all. The book begins by presenting anecdotes and the author's personal story to lay the foundation for what literacies are and what literacy is not. An activity, *Spiral of Literacy*, allows readers to reflect on their own literacies. Chapters that follow each begin with a story that sets the theoretical foundation. Each chapter concludes with an action section that demonstrates how to turn theory to practice, whether you are in a library, a classroom or at home. A final chapter envisions what libraries might look like in 10 years through interviews with librarians, teachers and others interested in literacy.
