Racism is still very prevalent and pervasive in all aspects of the P 12 educational experience in the United States Far too many teachers and administrators continue to respond to this challenge by applying colorblind perspectives and approaches This edited volume provides a broad and comprehensive critique of colorblindness in various educational contexts In an attempt to advocate for a more color conscious approach to education this book deals with a wide range of issues related to teaching learning curriculum creativity assessment discipline implicit bias and teacher education There are three distinct features that make this book so important and relevant given the current social and racial climate in U S schools today First each chapter in this book draws from a plethora of different theoretical perspectives related to race and racism In this sense readers are equipped with variety of robust theoretical perspectives to better understand this complicated issue of racism in schools Second this book communicates issues of race and racism through multiple voices Unlike other books on race and racism where the central voice is that of a researcher or scholar this book centralizes the voices and perspectives of researchers teachers and teacher educators alike As a result readers are better able to understand issues of race and racism in schools from a more nuanced perspective Finally unlike other books related to race and racism in schools this book provides readers with practical strategies for combating racism in their respective educational contexts     **Teaching Children Ann**

El-Moslimany,2018-01-01 The author explores education from the essential principles of Tawhid Oneness of God humanity knowledge fitrah concept of human nature and the role of humans as vicegerents of God on earth responsibility and stewardship The current education system dates back a hundred years or more and is in desperate need of a reboot In developing the industrialized society the education system itself became like a factory the end product being pupils who merely regurgitate facts and themselves end up as cogs in the machine that is the wider industrial complex The legacy of this

is a soulless functional educational system that fails to develop pupils to meet the present and future needs of individuals and their expectations This failure inevitably impacts on society and humanity at large Society has long since moved beyond the industrial revolution and into an age of global connectedness where the sum of human knowledge is freely available via the internet It is an age where people are generally more well informed and on a variety of issues An effective holistic educational philosophy is required one that gives full spiritual meaning to all that a child learns It should equip children with spiritual awareness morals and values social responsibility and accountability self discipline and self determination self confidence and empowerment ambition and aspiration tempered with thoughtfulness and a sense of gratitude
