A Practical Introduction to Day Trading Don Charles, 2018-11-14 Many individuals enter financial markets with the objective of earning a profit from capitalizing on price fluctuations However many of these new traders lose their money in attempting to do so The reason for this is often because these new traders lack any fundamental understanding of financial markets they cannot interpret any data and they have no strategy for trading Trading in markets is really about deploying strategies and managing risks Indeed successful traders are those who have strategies which they have proved to be consistent in granting them more financial gains than financial losses The purpose of this book is to help a potentially uninformed retail trader or inquisitive reader understand more about financial markets and assist them in gaining the technical skills required to profit from trading It represents a beginner's guide to trading with a core focus on stocks and currencies

Managing New Office Technology Calvin H. P. Pava, 1983

The first book to combine in one account the technical and social aspects of office organization Eric Trist The new electronic office technology has been much praised for the increased speed precision and memory capacities it offers office management But do these improvements mean increased productivity Not by themselves says Calvin Pava Equally important to the high performance of office work will be its organization not only of clerical support personnel and equipment but of management and staff professionals This book is the first to define the organizational challenge posed to management by new office technology Calvin Pava breaks the myth that these are simple issues for technical solution alone Based on research conducted at the Harvard Business School Managing New Office Technology takes a method of organization design with a proven track record in industrial settings and shows how this organizational self analysis and self directed change can be applied successfully to offices Using sociotechnical design a method that takes into account both the technology and structure of work Pava shows how changes in an office s organization can lead to more satisfying and productive results The goal and the proven achievement of sociotechnical design is to organize people work and their tools so their efforts are efficiently complementary At the core of Managing New Office Technology are three detailed case studies that show the principles of sociotechnical design at work These examples of the planning designing and implementing of organizational change in an order processing customer service department a computer systems firm and a payroll department show step by step how to apply the procedure across a broad range of different activities Unlike other books on the subject which deal principally with clerical work and show little interest in bridging the gap between theory and application Managing New Office Technology extends to address the work of management and staff professionals and shows how reorganizing is done Moreover recognizing that outside interests have a stake in the effects of technological development in offices Pava provides a framework for addressing the concerns of such groups as displaced professionals minorities middle managers clerical support staff old workers young workers and organized labor A glossary of terms and an afterword by Eric Trist originator of the sociotechnical approach round out this long awaited work For managers concerned about astute deployment of new office technology and for those who are also anxious about the larger implications for society of the growth of automation in
