Pathways With Purpose Sarah J. Royer,2018-08-21 When I started thinking about building a Faith based curriculum for the early childhood classroom my goal was to create a curriculum that would catch the interest of children 0 Kindergarten See I have worked in the early childhood classroom for almost two decades and while the goal is at the heart of

the curriculum I have used the interest it has sparked in our young ones is mild and dulled down at best How can we best instill an excitement to learn in our young ones By making the material and manipulatives hands on and exciting I don't mean by reading a story and pulling out paper puppets on craft sticks although this may be what some children like and want to explore What I mean is presenting values and morals in an explorative manner in conjunction with developmentally appropriate learning standards that help engage your students in learning experiences while getting them excited Including stories and sensory materials story buckets role playing with dress up materials including a variety of mixed media to spark your student's interests is absolutely necessary Create an environment that appeals to learners of various ages backgrounds and learning styles Make your lesson times fun and interesting and your learners will gravitate back for more

Occupational Therapy Models for Intervention with Children and Families Sandra Barker Dunbar, 2007

This textbook explores recent theoretical models that enable occupational therapists to practice and interact with families in a more holistic and occupation centered manner It offers the latest information on viewing the broader contexts of environment and family in order to meet diverse occupational needs in a range of settings The editor presents a variety of case scenarios that feature culturally diverse populations and varying diagnoses of children with occupational needs With contributions from 11 leaders in occupational therapy this comprehensive text is designed to increase awareness and understanding of theoretical models and

their relationship to current occupational therapy practice with today's children and families. Traditional frames of reference in pediatric practice are explored, including sensory integration and neurodevelopmental treatment. Some current theoretical models discussed include the Model of Human Occupation, the Person-Environment-Occupation model, the Ecology of Human Performance model, and the Occupational Adaptation model. The new Occupational Therapy Practice Framework is incorporated throughout the text. Overall, the textbook employs a practical approach to this significant aspect of pediatric practice in occupational therapy.
