Monthly Catalog of United States Government Publications ,1998-07 **Monthly Catalogue, United States Public Documents** ,1995 *Handbook of Optimization in Electric Power Distribution Systems* Mariana Resener,Steffen Rebennack,Panos M. Pardalos,Sérgio Haffner,2020-02-24 This handbook gathers state of the art research on optimization problems in power distribution systems covering classical problems as well as the challenges introduced by distributed power generation and smart grid resources It also presents recent models solution techniques and computational tools to solve planning problems for power distribution systems and explains how to apply them in distributed and variable energy generation resources As such the book therefore is a valuable tool to leverage the expansion and operation planning of electricity distribution networks

Australia's Energy Transition Glen Currie,2020-08-01 This book studies Australia a country characterized by the highest concentration of domestic photovoltaic systems In addition the high level of solar energy that Australia receives makes these systems a significant part of its energy mix International electricity system managers take note your systems are heading this way The energy transition is an emerging field and few texts have been published that can help energy planners as this book does The research presented is sociotechnical in nature and reveals that the main challenge in the energy transition is its emerging social role Very few works combine the social and technical fields of energy Given its scope the book will appeal to readers interested in policy regulation and energy systems including government employees involved in energy system management all around the world
