Natalie Kalmus developed an aesthetic that complemented the classical Hollywood filmmaking style while still offering innovative novelty. By the end of the 1930s color in film was thoroughly harnessed to narrative and it became elegantly expressive without threatening the coherence of the film's imaginary world. *Harnessing the Technicolor Rainbow* is the first scholarly history of Technicolor aesthetics and technology as well as a thoroughgoing analysis of how color works in film. Scott Higgins draws on extensive primary research and close analysis of well-known movies including *Becky Sharp*, *A Star Is Born*, *Adventures of Robin Hood*, and *Gone with the Wind* to show how the Technicolor films of the 1930s forged enduring conventions for handling color in popular cinema. He argues that filmmakers and designers rapidly worked through a series of stylistic modes based on the demonstration, restraint, and integration of color and shows how the color conventions developed in the 1930s have continued to influence filmmaking to the present day. Higgins also formulates a new vocabulary and a method of analysis for capturing the often elusive functions and effects of color that in turn open new avenues for the study of film form and lay a foundation for new work on color in cinema.

Giovanni Paolo Lomazzo's Trattato dell'Arte della Pittura: Color, Perspective and Anatomy Barbara Tramelli, 2016-11-07. Barbara Tramelli's *Giovanni Paolo Lomazzo's Trattato dell'Arte della Pittura: Color, Perspective and Anatomy* investigates the context in which the writings of the painter Giovanni Lomazzo were produced, the types of theoretical and practical knowledge which they conveyed to artists, and how painters in the second half of the sixteenth century shared this knowledge among themselves. In his books, Lomazzo drew on earlier and contemporary art literature, his own expertise as a painter, works of natural philosophy, and his personal exchanges with contemporary artists, astrologers, and scientists. Lomazzo and his work are placed in the context of the city where he operated and published, paying particular attention to the role of Milanese institutions as spaces of interactions with colleagues and men of letters in which the material for his books was discussed and collected. Tramelli highlights three main areas of Lomazzo's studies: color, perspective, and anatomy, linking his theoretical discourse to what was known and discussed about these topics in Milan at the end of the sixteenth century.

Alter Joanna Pettersson, 2022-03-31. *Alter* is a story of courage, passion, and selflessness. In a world ruled by Gods, Goddesses, and Fate, two Princes meet; perhaps it is better to say, clash. *Alter: The Chosen One* tells his memoirs at a breathtaking pace. Flashbacks return to the present, twists and turns set the pace for the writing of this compelling story. The son of the Gods and the son of Demons: what can happen when two opposing people, two worlds that have always fought each other, come together? Intrigue, kidnapping, revenge, and magic frame the meeting of two souls. The royal obligations of Alter and Malager only complicate the relationship between the two. Not even the help of all the Gods and Goddesses will prevent the Reader from getting involved in this overwhelming adventure. Joanna Pettersson, pen name, was born in Słupsk in northern Poland. She received her MA in Scandinavian languages from Adam Mickiewicz University in Poznań and achieved her PhD in linguistics at the University of Lund. Since then, she works as a university lecturer.
