Nicholson,2016-01-13 Philosophy of Education in Action is an innovative inquiry based introductory text that invites readers to study philosophy of education through the lens of their own observations and experiences Structured according to a Wonder Model of Inquiry each chapter begins by posing a fundamental What if question about curriculum pedagogy and the role of the school before investigating the various philosophical perspectives that guide and influence educational practices Classroom vignettes and examples of actual schools and educational programs help to ground philosophical perspectives in real world scenarios while the book s unique inquiry based approach leads students to both think critically about philosophical questions and apply the concepts to their own teaching Features of the text include What if questions that structure each chapter to pique students curiosity stimulate creativity and promote critical thinking Authentic classroom vignettes that encourage students to analyze what it means to do philosophy and to reflect upon their own practices examine their role in the educational process and articulate their own philosophical beliefs A concluding section asking readers to imagine and design their own hypothetical school or classroom as a project based means of analyzing synthesizing and evaluating the different philosophies discussed Accessible and thought provoking Philosophy of Education in Action provides a dynamic learning experience for readers to understand and apply philosophy in educational practice **Restitution Pursuant to the Victim and Witness Protection Act** United States. Department of Justice. Criminal Division,William F. Weld,1987 Thinking Practices in Mathematics and Science Learning James G. Greeno,Shelley V. Goldman,2013-04-03 The term used in the title of this volume thinking practices evokes questions that the authors of the chapters within it begin to answer What are thinking practices What would schools and other learning settings look like if they were organized for the learning of thinking practices Are thinking practices general or do they differ by disciplines If there are differences what implications do those differences have for how we organize teaching and learning How do perspectives on learning cognition and culture affect the kinds of learning experiences children and adults have This volume describes advances that have been made toward answering these questions These advances involve several agendas including increasing interdisciplinary communication and collaboration reconciling research on cognition with research on teaching learning and school culture and strengthening the connections between research and school practice The term thinking practices is symbolic of a combination of theoretical perspectives that have contributed to the volume editors understanding of how people learn how they organize their thinking inside and across disciplines and how school learning

might be better organized By touring through some of the perspectives on thinking and learning that have evolved into school learning designs Greeno and Goldman begin to establish a frame for what they are calling thinking practices This volume is a significant contribution to a topic that they believe will continue to emerge as a coherent body of scientific and educational research and practice
