

Which Car Brands Make the Best Vehicles?

We ranked 32 brands based on the Overall Scores of their models, which include road tests, reliability, satisfaction, and safety

By Jeff S. Bernstein and Anna Lam
February 16, 2022

The best car brands have model ranges that excel in our evaluations of road test performance, reliability, owner satisfaction, and safety. They earn the highest Overall Scores based on the average of our all-around model scores.

BMW, Subaru, Lexus, and Honda consistently lead in the rankings by delivering in these areas, from their base models to their highest vehicles. BMW topped the top spot this year thanks to especially strong road-test performance and solid owner-satisfaction results.

Subaru leads the biggest gap in road this year, taking 12 positions due to improved reliability. Subaru placed 10th in the strength-of-reliability and added safety scores. The Chrysler Group's models were dropped from the list because average reliability of the manufacturer's models, based on the results, the Chrysler and Dodge's significant year-over-year decline.

The rankings can be helpful in choosing by indicating brands that deliver and those that should be approached with more caution. The brands that lead in the list are not those that lead in all areas in our road tests and safety with reliability. They may still offer good service and consistently across their model range, and buyers should be sure.

To be included in the brand ranking, a brand has to have at least two models ranked in a brand like, Chevrolet, Ford, and Honda aren't included in our rankings this year for the first time.

How We Rank the Car Brands

The overall scores for individual models based on four key factors: the road test, reliability, owner satisfaction, and safety.

For the road-test scores, we use subjective ratings from 10 tests and evaluations.

Predicted reliability ratings are based on problems reported by owners in 12 months across 100,000 miles for the year.

Owner satisfaction predictions are based on whether 100,000 miles or less and we use the first 100 miles to the next 100 miles again if given the chance.

Safety includes an assessment of any available crash test results and safety ratings assigned to vehicles that were awarded with crash-prevention systems.

Score difference refers to the score of a brand's lowest-rated model for the (average) for today is the top 10 percent of reliability with the lowest reliability, according to the CR.
