by the author of *Endgame*

DERRICK JENSEN  
AND ARIC MCBAY

"This is a fierce book. . . . Its basic premise—that we're in worse trouble than we understand, and that a little change around the edges won't help—is precisely the message that needs to get out."

—Bill McKibben

### **What We Leave Behind Aric Mcbay:**

**What We Leave Behind** Derrick Jensen, Aric McBay, 2011-01-04 What We Leave Behind is a piercing impassioned guide to living a truly responsible life on earth Human waste once considered a gift to the soil has become toxic material that has broken the essential cycle of decay and regeneration Here award winning author Derrick Jensen and activist Aric McBay weave historical analysis and devastatingly beautiful prose to remind us that life human and nonhuman will not go on unless we do everything we can to facilitate the most basic process on earth the root of sustainability one being s waste must always become another being s food Deep Green Resistance Derrick Jensen, Aric McBay, Lierre Keith, 2011-01-04 For years

Derrick Jensen has asked his audiences Do you think this culture will undergo a voluntary transformation to a sane and sustainable way of life No one ever says yes Deep Green Resistance starts where the environmental movement leaves off industrial civilization is incompatible with life Technology can t fix it and shopping no matter how green won t stop it To save this planet we need a serious resistance movement that can bring down the industrial economy Deep Green Resistance evaluates strategic options for resistance from nonviolence to guerrilla warfare and the conditions required for those options to be successful It provides an exploration of organizational structures recruitment security and target selection for both aboveground and underground action Deep Green Resistance also discusses a culture of resistance and the crucial support role that it can play Deep Green Resistance is a plan of action for anyone determined to fight for this planet and win

**What Every Environmentalist Needs to Know about Capitalism** Fred Magdoff, John Bellamy Foster, 2011-06 Praise for Foster and Magdoff s The Great Financial Crisis In this timely and thorough analysis of the current financial crisis Foster and Magdoff explore its roots and the radical changes that might be undertaken in response This book makes a valuable contribution to the ongoing examination of our current debt crisis one that deserves our full attention Publishers Weekly There is a growing consensus that the planet is heading toward environmental catastrophe climate change ocean acidification ozone depletion global freshwater use loss of biodiversity and chemical pollution all threaten our future unless we act What is less clear is how humanity should respond The contemporary environmental movement is the site of many competing plans and prescriptions and composed of a diverse set of actors from militant activists to corporate chief executives This short readable book is a sharply argued manifesto for those environmentalists who reject schemes of green capitalism or piecemeal reform Environmental and economic scholars Magdoff and Foster contend that the struggle to reverse ecological degradation requires a firm grasp of economic reality Going further they argue that efforts to reform capitalism along environmental lines or rely solely on new technology to avert catastrophe misses the point The main cause of the looming environmental disaster is the driving logic of the system itself and those in power no matter how green are incapable of making the changes that are necessary What Every Environmentalist Needs To Know about Capitalism tackles the two largest issues of our time the ecological crisis and the faltering capitalist economy in a way that is thorough

accessible and sure to provoke debate in the environmental movement      A Critique of the Moral Defense of Vegetarianism  
Andrew F. Smith, 2016-04-29 Drawing on research in plant science systems ecology environmental philosophy and cultural anthropology Andrew F Smith shatters the distinction between vegetarianism and omnivorism The book outlines the implications that these manufactured distinctions have for how we view food and ourselves as eaters      *Shadowing the Anthropocene: Eco-Realism for Turbulent Times* Adrian Ivakhiv, 2018 A spectre is haunting humanity the spectre of a reality that will outwit and in the end bury us The Anthropocene or The Human Era is an attempt to name our geological fate that we will one day disappear into the layer cake of Earth's geology while highlighting humanity in the starring role of today's Earthly drama In *Shadowing the Anthropocene* Adrian Ivakhiv proposes an ecological realism that takes as its starting point humanity's eventual demise The only question for a realist today he suggests is what to do now and what quality of compost to leave behind with our burial The book engages with the challenges of the Anthropocene and with a series of philosophical efforts to address them including those of Slavoj Žižek and Charles Taylor Graham Harman and Timothy Morton Isabelle Stengers and Bruno Latour and William Connolly and Jane Bennett Along the way there are volcanic eruptions and revolutions ant cities and dog parks data clouds and space junk pagan gods and sacrificial altars dark flow souls of things and jazz Ivakhiv draws from centuries old process relational thinking that hearkens back to Daoist and Buddhist sages but gains incisive re invigoration in the philosophies of Charles Sanders Peirce and Alfred North Whitehead He translates those insights into practices of engaged Anthropocenic bodymindfulness aesthetic ethical and ecological practices for living in the shadow of the Anthropocene      *Truths Among Us* Derrick Jensen, 2011-09-01 From Derrick Jensen acclaimed author of *Endgame* and *The Culture of Make Believe* comes a prescient thought provoking collection of interviews with ten leading writers philosophers teachers and activists To function in this society we are asked to live by lies that humans have the right to take what they want from the earth without giving back that knowledge is limited to that which can be quantified that corporations and governments know what is best for our future Our instinctive outrage at environmental collapse political conspiracy and corporate corruption is stifled by the double speak of popular opinion telling us that the progress of civilization demands unquestioning allegiance to those in power But the brave voices in *Truths Among Us* seek to help us acknowledge the values we know in our hearts are right and inspire within us the courage to act on them Among those who share their wisdom here is acclaimed sociologist Stanley Aronowitz who shows us that science is but one lens through which we can discover knowledge Luis Rodriguez poet and peacemaker asks us to embrace gang members as people instead of stereotypes while the brilliant Judith Herman helps us gain a deeper understanding of the psychology of abusers in whatever form they may take Paul Stamets reveals the power of fungi whose intelligence like that of so many nonhumans is often ignored And writer Richard Drinnon reminds us that our spiritual paths need not be narrowed by the limiting mythologies of Western civilization Following *How Shall I Live My Life* and *Resistance Against Empire* Jensen's third collection of interviews

reinforces a simple premise with which he has long challenged his readers if we shut our ears and eyes to the cacophony of consumption oriented distractions and pause to listen to the wisdom of our own hearts the truths among us will reveal themselves Interviewees include George Gerbner Stanley Aronowitz Luis Rodriguez Judith Herman John Keeble Richard Drinnon Paul Stamets Marc Ian Barasch Martin Prechtel and Jane Caputi *Dreams* Derrick Jensen, 2011-01-04 Jensen's furthest reaching book yet *Dreams* challenges the destructive nihilism of writers like Richard Dawkins and Sam Harris who believe that there is no reality outside what can be measured using the tools of science He introduces the mythologies of ancient cultures and modern indigenous peoples as evidence of alternative ways of understanding reality informed by thinkers such as American Indian writer Jack Forbes theologian and American Indian rights activist Vine Deloria Shaman Martin Prechtel Dakota activist and scholar Waziyatawin and Okanagan Indian writer Jeannette Armstrong He draws on the wisdom of Dr Paul Stamets author of *Mycelium Running How Mushrooms Can Help Save the World* sociologist Stanley Aronowitz who discusses science's lack of accountability to the earth and many more As in his other books Jensen draws heavily from his own life experience living alongside the frogs redwoods snails birds and bears of the upper northwest about which he writes with exquisite tenderness Having taken on the daunting task of understanding one's dreams as a source of knowledge Jensen achieves the near impossible in this breathtakingly brave and ambitious new work **The Derrick Jensen Reader** Derrick Jensen, 2012-07-03 In an age marked by seemingly unstoppable environmental collapse and the urgent quest for solutions environmental philosopher Derrick Jensen the voice of the growing deep ecology movement reveals for us new seeds of hope Here for the first time in *The Derrick Jensen Reader* are collected generous selections from his prescient unflinching books on the problem of civilization and the path to true resistance In the acclaimed *A Language Older Than Words* Jensen dissects his own abusive childhood to examine the pathology of Western culture and shares with us the power and beauty of an alliance with the natural world He continues to use the lens of his own experience as well as the wisdom of philosophers activists and teachers to expose oppression and call us to action in his other early works *Listening to the Land A Culture of Make Believe* *Strangely Like War* and *Walking on Water* We see his analysis deepen when he asks us to accept that the only moral response to biocide is resistance in the two volume *Endgame* a truth he explores further in *Thought to Exist in the Wild* *What We Leave Behind* the graphic novel *As The World Burns* and in his two novels *Songs of the Dead* and *Lives Less Valuable* And in *Dreams* Jensen's latest work he leads us still further toward his vision for a healed planet freeing us to see beyond the limits of our present culture to a future luminous with meaning **This is Environmental Ethics: An Introduction** Wendy Lynne Lee, 2022-07-18 Provides students and scholars with a comprehensive introduction to the growing field of environmental philosophy and ethics Mitigating the effects of climate change will require global cooperation and lasting commitment Of the many disciplines addressing the ecological crisis philosophy is perhaps best suited to develop the conceptual foundations of a viable and sustainable environmental ethic This

is Environmental Ethics provides an expansive overview of the key theories underpinning contemporary discussions of our moral responsibilities to non human nature and living creatures Adopting a critical approach author Wendy Lynne Lee closely examines major moral theories to discern which ethic provides the compass needed to navigate the social political and economic challenges of potentially catastrophic environmental transformation not only but especially the climate crisis Lee argues that the ethic ultimately adopted must make the welfare of non human animals and plant life a priority in our moral decision making recognizing that ecological conditions form the existential conditions of all life on the planet Throughout the text detailed yet accessible chapters demonstrate why philosophy is relevant and useful in the face of an uncertain environmental future Questions which environmental theory might best address the environmental challenges of climate change and the potential for recurring pandemic Discusses how inequalities of race sex gender economic status geography and species impact our understanding of environmental dilemmas Explores the role of moral principles in making decisions to resolve real world dilemmas Incorporates extensive critiques of moral extensionist and ecocentric arguments Introduces cutting edge work done by radical deep green writers animal rights theorists eco phenomenologists and ecofeminists This is Environmental Ethics is essential reading for undergraduate students in courses on philosophy geography environmental studies feminist theory ecology human and animal rights and social justice as well as an excellent graduate level introduction to the key theories and thinkers of environmental philosophy

**Tangled Roots** Matt Soltys,2012      **The Ecological Rift** John Bellamy Foster,Brett Clark,Richard York,2011-11-01 Humanity in the twenty first century is facing what might be described as its ultimate environmental catastrophe the destruction of the climate that has nurtured human civilization and with it the basis of life on earth as we know it All ecosystems on the planet are now in decline Enormous rifts have been driven through the delicate fabric of the biosphere The economy and the earth are headed for a fateful collision if we don t alter course In The Ecological Rift Capitalism s War on the Earth environmental sociologists John Bellamy Foster Brett Clark and Richard York offer a radical assessment of both the problem and the solution They argue that the source of our ecological crisis lies in the paradox of wealth in capitalist society which expands individual riches at the expense of public wealth including the wealth of nature In the process a huge ecological rift is driven between human beings and nature undermining the conditions of sustainable existence a rift in the metabolic relation between humanity and nature that is irreparable within capitalist society since integral to its very laws of motion Critically examining the sanguine arguments of mainstream economists and technologists Foster Clark and York insist instead that fundamental changes in social relations must occur if the ecological and social problems presently facing us are to be transcended Their analysis relies on the development of a deep dialectical naturalism concerned with issues of ecology and evolution and their interaction with the economy Importantly they offer reasons for revolutionary hope in moving beyond the regime of capital and toward a society of sustainable human development

**Political Spirituality in the Face of Climate Collapse** James W.

Perkinson,2024-07-08 This book takes its motive force from our contemporary climate crisis It seeks to reorient human and especially Christian understanding towards a more ecologically focused indigenously informed way of living James W Perkinson argues that our current eco climatic and socio political emergency is the culmination of a 5 000 year history of supremacist settlement in which city states first emergent in Mesopotamia and Egypt not only begin coercively organizing labor into surplus production and ecosystems into inordinate and destructive yields of goods but in the process also simultaneously deform the Spirit World haloing of natural phenomenon into outsized service of imperial reach Perkinson recognizes globalized humanity as an emerging monstrosity destroying both human culture and the world How we re envision and revalue at our critical juncture our inescapable interdependence with the more than human world as peer and teacher and even elder is the central theme that throbs below the surface of the very disparate topics commanding attention in each chapter

**Capitalism in the Anthropocene** John Bellamy Foster,2022-08-23 Over the last 11 700 years during which human civilization developed the earth has existed within what geologists refer to as the Holocene Epoch Now science is telling us that the Holocene Epoch in the geological time scale ended replaced by the onset of a new more dangerous Anthropocene Epoch which began around 1950 The Anthropocene Epoch is characterized by an anthropogenic rift in the biological cycles of the Earth System marking a changed reality in which human activities are now the main geological force impacting the earth as a whole generating at the same time an existential crisis for the world s population What caused this massive shift in the history of the earth In this comprehensive study John Bellamy Foster tells us that a globalized system of capital accumulation has induced humanity to foul its own nest The result is a planetary emergency that threatens all present and future generations throwing into question the continuation of civilization and ultimately the very survival of humanity itself Only by addressing the social aspects of the current planetary emergency exploring the theoretical historical and practical dimensions of the capitalism s alteration of the planetary environment is it possible to develop the ecological and social resources for a new journey of hope

**Composting Inside and Out** Stephanie Davies,2011-03-07 Rethink Your Refuse Hundreds of millions of tons of solid waste are produced in the U S annually and the landfills simply store it not eliminate it Recycling diverts significant amounts of waste but the fact remains that the majority of landfill space is occupied by organic material The good news is composting is a natural and beneficial way to eliminate this waste and anyone can do it Whether you live on a farm in the suburbs or a city apartment composting is possible Composting Inside and Out will introduce you to the essentials and explore various methods of indoor and outdoor composting to help you find the perfect fit for your lifestyle Inside you ll find A compete overview of the composting process Advice on finding the right equipment Step by step instruction for fourteen different composting methods Ideas for using the soil you produce Quick answers to common problems Whether you create a compost heap bury your scraps ferment them tumble them or feed them to the worms you too can be successful with composting Use the fruits of your labor on you houseplants your lawn your flowerbeds or your garden

Put your waste and your energy to good use Reclaim the benefits of participating in the planet's health through composting its rewards are simply miraculous

Maritime Heritage in Crisis Richard M. Hutchings, 2016-12-08 Grounded in critical heritage studies and drawing on a Pacific Northwest Coast case study *Maritime Heritage in Crisis* explores the causes and consequences of the contemporary destruction of Indigenous heritage sites in maritime settings Maritime heritage landscapes are undergoing a period of unprecedented crisis these areas are severely impacted by coastal development continued population growth and climate change Indigenous heritage sites are thought to be particularly vulnerable to these changes and cultural resource management is frequently positioned as a community's first line of defense yet there is increasing evidence that this archaeological technique is an ineffective means of protection Exploring themes of colonial dislocation and displacement Hutchings positions North American archaeology as neoliberal statecraft a tool of government designed to promote and permit the systematic clearance of Indigenous heritage landscapes in advance of economic development Presenting the institution of archaeology and cultural resource management as a grave threat to Indigenous maritime heritage *Maritime Heritage in Crisis* offers an important lesson on the relationship between neoliberal heritage regimes and global ecological breakdown

role in the history of the Civil Rights movement and continuing on as unstinting critic of US foreign policy Anuradha Mittal is an internationally renowned expert on trade development human rights democracy and agriculture issues and is the founder of The Oakland Institute which works to ensure public participation and democratic debate on crucial economic and social policy issues

Spiritual Ecology Leslie E. Sponsel, 2012-07-19 A prominent scientist and scholar documents and explains the thoughts actions and legacies of spiritual ecology's pioneers from ancient times to the present demonstrating how the movement may offer the last chance to restore a healthy relationship between humankind and nature An internet search for Spiritual Ecology and related terms like Religion and Nature and Religion and Ecology reveals tens of millions of websites Spiritual Ecology A Quiet Revolution offers an intellectual history of this far reaching movement Arranged chronologically it samples major developments in the thoughts and actions of both historic and contemporary pioneers ranging from the Buddha and St Francis of Assisi to Wangari Maathai's Green Belt Movement and James Cameron's 2010 epic film Avatar This foundational book is unique in that it provides a historical cross cultural context for understanding and advancing the ongoing spiritual ecology revolution considering indigenous and Asian religious traditions as well as Western ones Most chapters focus on a single pioneer illuminating historical context and his/her legacy while also connecting that legacy to broader concerns Coverage includes topics as diverse as Henry David Thoreau and the Green Patriarch Bartholomew's decades long promotion of environmentalism as a sacred duty for more than 250 million members of the Orthodox Church worldwide For more information visit [www.spiritualecology.info](http://www.spiritualecology.info)

*The Vegetarian Myth* Lierre Keith, 2009-05-01 We've been told that a vegetarian diet can feed the hungry honor the animals and save the planet Lierre Keith believed in that plant based diet and spent twenty years as a vegan But in *The Vegetarian Myth* she argues that we've been led astray not by our longings for a just and sustainable world but by our ignorance The truth is that agriculture is a relentless assault against the planet and more of the same won't save us In service to annual grains humans have devastated prairies and forests driven countless species extinct altered the climate and destroyed the topsoil the basis of life itself Keith argues that if we are to save this planet our food must be an act of profound and abiding repair it must come from inside living communities not be imposed across them Part memoir part nutritional primer and part political manifesto *The Vegetarian Myth* will challenge everything you thought you knew about food politics

*Eco-Nihilism* Wendy Lynne Lee, 2017-02-22 If we were to ask what is the root cause of our current and unprecedented environmental crisis climate change many particularly on the progressive Left would refer to the excesses of capitalism and they'd be right In *Eco Nihilism The Philosophical Geopolitics of the Climate Change Apocalypse* Wendy Lynne Lee demonstrates that there are no versions of conquest capital compatible with the fact of a finite planet and that a logic whose operating premise is growth is destined to not only exhaust our planetary resources but also generate profound social injustice and geopolitical violence in its pursuit Nonetheless it is clear that the violence and injustice of capital is selective some benefit greatly while others are subjugated to its pathological drive to profit Hence Lee

argues that any comprehensive analysis of what Jason Moore has dubbed the Capitalocene must include an equally probing account of human chauvinism that is the axes along which capital is supplied with resources and labor Defined in terms of race sex gender and species these axes come ready made to the advantage of capitalist commodification Without an understanding of how and why humanity will remain doomed to settling for a sustainably unjust world as opposed to realizing a just and desirable one Indeed on our current trajectory we may not even achieve the sustainable The introduction of climate change into the mix of environmental deterioration the ever widening economic gap between global North and global South and the accelerating violence of terrorism civil war and human slavery make of a warming planet a combustible world The only way out requires ending the myth of endless resources a rejection of climate change denial and a radical re valuation of human centeredness not as a locus of power but as an opportunity to take moral and epistemic responsibility for a world whose biotic diversity and ecological integrity make the struggle to realize it worthwhile This solution demands not only an end to capitalism but the deliberate reclamation of value aesthetic moral and civic and a radical transformation of both personal and collective conscience Lee appeals to the experiential aesthetics of John Dewey and the feminist concept of the standpoint of the subjugated She argues for a version of the precautionary principle informed by an environmentally and socially responsible concept of the desirable future as the clearest path away from the precipice
