Place, Race, and Identity Formation Ed Douglas McKnight,2017-04-07 In this work of curriculum theory Ed Douglas McKnight addresses and explores the intersections between place with specific discussion of Kincheloe s and Pinar s conceptualization of place and identity and race specifically Winthrop Jordan s historical analysis of race as an Anglo European construction that became the foundation of a white mythos To that end he employs a form of narrative construction called curriculum vitae course of life a method of locating and delineating identity formation which addresses how theories of place race and identity formation play out in a particular concrete life By working through how place racializes identity and existence the author engages in a long Southern tradition of storytelling but in a way that turns it inside out Instead of telling his own story as a means to romanticize the sins of the southern past he tells a new story of growing up within the white discourse of the Deep South in the 1960s and 70s tracking how his racial identity was created and how it has followed him through life Significant in this narrative is how the discourse of whiteness and place continues to express itself even within the subject position of a curriculum theorist teaching in a large Deep South university The book concludes with an elaboration on the challenges of engaging in the necessary anti racist complicated conversation within education to begin to work through and cope with heavy racialized inheritances

Cotton Capitalists Michael R Cohen, 2017-12-05 Effectively argues that ethnic networks were important to Jewish businesses as they participated in the cotton economy. In the nineteenth century Jewish merchants created a thriving niche economy in the United States, most important industry cotton. *Cotton Capitalists* argues that Jewish merchants' status as a minority fueled their success by fostering ethnic networks of trust. Trust in the nineteenth century was the cornerstone of economic transactions, and this trust was largely fostered by ethnicity. Much as money flowed along ethnic lines between Anglo-American banks, Jewish merchants in the Gulf South used their own ethnic ties with other Jewish-owned firms in New York as well as Jewish investors across the globe to capitalize their businesses. They relied on these family connections to direct Northern credit and goods to the war-torn South, avoiding the constraints of the anti-Jewish prejudices which had previously denied them access to credit, allowing them to survive economic downturns. These American Jewish merchants reveal that ethnicity matters in the development of global capitalism. The story of Jews in the American cotton trade is far more than the story of American Jewish success and integration; it is the story of the role of ethnicity in the development of global capitalism. This eloquent study reminds us that we cannot fully understand the South's economic revival in the age of reconstruction without looking at the critical role played by immigrant Jewish merchants. Rebecca Kobrin Knapp, Associate Professor of American Jewish History, Columbia University. Michael R. Cohen's well-written book reveals how Jews played a key role in building the cotton economy of the South. *The Jewish Chronicle*.
