Gridlock Randal O'Toole,2010-01-18 America is the most mobile society in history but our transportation system is on the verge of collapse Traffic congestion is today five times greater than it was 25 years ago yet many transportation plans and projects are making it worse As Randal O Toole reveals in Gridlock the prime causes of our ailing system are a government transportation planning philosophy whose primary goal is to diminish

auto use hence personal mobility in combination with federal budget incentives that perversely encourage transportation planners to increase congestion As a result the automobile which is accessible to almost every family in the nation and provides unparalleled access to better housing low cost consumer goods a choice driven affordable life and freedom is being deliberately forced off the transportation grid by the expensive solution of little used high speed trains and urban transit lines

Gridlock presents a wide range of innovative ideas and policy recommendations for creating an effective transportation system improvements that will increase our mobility and pay for themselves whether it s cars buses planes or trains At the center of O Toole s solutions are three core principles those who use transportation facilities should pay for them negative effects should be dealt with in a cost efficient manner and new technologies that will increase mobility at a low cost must be embraced In Gridlock Randal O Toole brings energetic and unconventional thinking to transportation strategies that have until now only driven us into the breakdown lane
