Urban Composition Developing Community Through Design Mark C Childs:

Urban Composition Mark C. Childs, 2013-07-02 Cities and towns are among humanity's greatest achievements yet no single individual or organization creates them. The buildings, streets, and gardens of even a small town embody substantial investments of money, natural resources, and political capital. Much more than the sum of its parts, a settlement's vitality comes from its collective composition. Sometimes the cities and towns that emerge are glorious places, but too frequently they have only fragments of greatness or are soulless and environmentally unhealthy. Our new Architecture Brief Urban Composition shows architects, planners, artists, and engineers of individual projects how they can best fulfill their public trust to help make meaningful urban places. Each chapter contains a set of design queries followed by a discussion, illustrations, and references for further research. This accessible primer on urban design provides guidelines for designing buildings or plans for large cities or small towns. Urban Composition showcases projects across the United States and internationally in metropolitan areas such as Chicago, Seattle, and London, and small communities such as Marfa, Texas.

The City Reader Richard T. LeGates, Frederic Stout, 2015-07-16 The sixth edition of the highly successful The City Reader juxtaposes the very best classic and contemporary writings on the city to provide the comprehensive mapping of the terrain of Urban Studies and Planning, old and new. The City Reader is the anchor volume in the Routledge Urban Reader Series and is now integrated with all ten other titles in the series. This edition has been extensively updated and expanded to reflect the latest thinking in each of the disciplinary areas included and in topical areas such as compact cities, urban history, place making, sustainable urban development, globalization, cities and climate change, the world city network, the impact of technology on cities, resilient cities, cities in Africa and the Middle East, and urban theory. The new edition places greater emphasis on cities in the developing world, globalization, and the global city system of the future. The plate sections have been revised and updated. Sixty generous selections are included: forty-four from the fifth edition and sixteen new selections, including three newly written exclusively for The City Reader. The sixth edition keeps classic writings by authors such as Ebenezer Howard, Ernest W. Burgess, LeCorbusier, Lewis Mumford, Jane Jacobs, and Louis Wirth, as well as the best contemporary writings of, among others, Peter Hall, Manuel Castells, David Harvey, Saskia Sassen, and Kenneth Jackson. In addition to newly commissioned selections by Yasser Elsheshtawy, Peter Taylor, and Lawrence Vale, new selections in the sixth edition include writings by Aristotle, Peter Calthorpe, Alberto Camarillo, Filip DeBoeck, Edward Glaeser, David Owen, Henri Pirenne, The Project for Public Spaces, Jonas Rabinovich, and Joseph Lietman. Doug Saunders and Bish Sanyal. The anthology features general and section introductions as well as individual introductions to the selected articles, introducing the authors, providing context relating the selection to other selections, and providing a bibliography for further study. The sixth edition includes fifty plates in four plate sections, substantially revised from the fifth edition.

Designing Suburban Futures June Williamson, 2013-05-07 Suburbs deserve a better, more resilient future. June Williamson shows that suburbs aren't destined to remain filled with strip malls and excess

parking lots they can be reinvigorated through inventive design Today dead malls aging office parks and blighted apartment complexes are being retrofitted into walkable sustainable communities Williamson provides a broad vision of suburban reform based on the best schemes submitted in Long Island s highly successful Build a Better Burb competition Many of the design ideas and plans operate at a regional scale tackling systems such as transit aquifer protection and power generation While some seek to fundamentally transform development patterns others work with existing infrastructure to create mixed use shared networks Designing Suburban Futures offers concrete but visionary strategies to take the sprawl out of suburbia creating a vibrant new suburban form

Sustainable Design David Bergman,2013-07-02 Written for students and practitioners in the fields of architecture and interior design our new Architecture Brief Sustainable Design provides a concise overview of all the techniques available for reducing the energy footprint of structures and spaces With clear simple language and a practical can do approach author David Bergman covers everything from the profession s ethical responsibility to design structures and spaces that sustain our natural resources to specific considerations such as rainwater harvesting graywater recycling passive heating techniques solar orientation green roofs wind energy daylighting indoor air quality material evaluation and specification and how to work with green building certification programs

Emergent Urbanism Tigran Haas,Krister Olsson,2016-04-29 In the last few decades many European and American cities and towns experienced economic social and spatial structural change Strategies for urban regeneration include investments in infrastructures for production consumption and communication as well as marketing and branding measures and urban design schemes Bringing together leading academics from across a range of disciplines including Douglas Kelbaugh Ali Madanipour Saskia Sassen Gregory Ashworth Nan Elin Emily Talen and many others Emergent Urbanism identifies the specific issues dominating today s urban planning and urban design discourse arguing that urban planning and design not only results from deliberate planning and design measures but how these combine with infrastructure planning and derive from economic social and spatial processes of structural change Combining explorations from urban planning urban theory human geography sociology urban design and architecture the volume provides a comprehensive and state of the art overview highlighting the complexities of these interactions in space and place process and design

Imagine a City That Remembers Anthony Anella,Mark C. Childs,2018-12 This expanded and updated collection juxtaposes historic and contemporary photographs of Albuquerque to show diverse moments in the city s history and development

Designing Relationships: The Art of Collaboration in Architecture Andrew Pressman,2014-01-03 In today s dynamic practice environment collaboration and teamwork skills are increasingly critical to the successful completion of building projects Indeed it is the careful nurturing of comradeship among complementary but distinctive egos that drives creativity underlying the hi tech algorithms that help shape complex projects Designing Relationships The Art of Collaboration in Architecture focuses on the skill set necessary to facilitate effective teamwork and collaboration among all stakeholders no matter what

project delivery mode or technology is deployed This book provides valuable guidance on how to design and construct buildings in a team context from inception to completion It is the less tangible elements of collaboration and teamwork that provide the magic that transforms the most challenging projects into great works of architecture and it is these more nuanced and subtle skills which the book brings to the fore Showing examples of best and worst practice to illustrate the principles with real life situations this book presents the reader with an approach that is flexible and applicable to their everyday working life

Professional Practice 101 Andrew Pressman, 2021-05-30

Professional practice courses often suffer from a boring reputation but there's nothing dull about this updated cornerstone edition of Professional Practice 101 which renders accessible the art and science of contemporary architectural practice. With its unique focus on links between design thinking and practice, this third edition brings an inspiring and fresh perspective to the myriad issues involved in successful architectural practice. The process of providing architectural services in today's constantly evolving practice environment must be just as creative, intellectually rigorous, and compelling as wrestling with design problems. In this new edition, packed with invaluable advice from leading experts, Andrew Pressman bridges the knowledge and experience gap between school and practice, covering topics such as Ethics, social responsibilities, and obligations to the environment; Design firm types, culture, and leadership; Financial, project, and time management; Service and project delivery; leveraging emerging technologies; Entrepreneurial business models and business development; Legal issues, including AIA contract document analysis; Collaboration and negotiating with clients and stakeholders; Practice-based research. Students and early career professionals will discover the fundamentals they need to launch their careers, as well as more sophisticated strategies that will allow them to thrive as their roles evolve and they assume increasing responsibilities. This engaging, comprehensive primer debunks the myth that recent architecture graduates have little or no guidance to prepare them for business. Professional Practice 101 is a learning tool that will readily deliver the knowledge and background for success in current architectural practice.

Resources in Education, 1997 [Informal STEM Learning at Home and in Community Spaces](#) Bradley Morris, Brenna Hassinger-Das, Rachael Todaro, Jennifer DeWitt, 2024-03-22 Children in Western countries spend only about 20% of their waking time in school. Meltzoff et al. 2009. Leveraging the 80% of time that they spend outside of school can provide children with opportunities to engage in meaningful, authentic STEM learning experiences with family members, other caregivers, and children. STEM learning and readiness go beyond acquiring content knowledge to include interest, engagement, and motivation for STEM learning, as well as the formation of a STEM identity. To date, there has been a dearth of research focusing on children's informal STEM experiences when compared to formal, school-based STEM learning experiences. This Research Topic focuses attention on the authentic, everyday experiences of children and how these experiences provide opportunities for STEM learning, engagement, and identity. In addition, these papers will explore how these everyday experiences can be leveraged and augmented to promote STEM learning and engagement through culturally relevant design and implementation.
