Beyond Stern Great Britain: Parliament: House of Commons: Environmental Audit Committee,2007-07-30 This report is about how the Government sets targets for reductions in UK green house gases assess progress towards these targets by forecasting the likely levels of future emissions choose policy instruments to deliver the requisite cuts in emissions and revises its package of policies in the light of experience It is two main parts the first looks at the Climate Change Programme Review whilst the second examines the proposed Climate Change Bill The Climate Change Programme Review revealed a number of weaknesses in the UK climate change policy as it became apparent that the target of a 20% reduction in carbon

emissions by 2010 would be missed Revisions to the projection of emissions had not been done frequently enough so by the time Ministers knew there were problems it was too late to introduce new measures The programme is however likely to be rescued somewhat by Phase II of the EU Emissions Trading Scheme which promises to deliver some real savings The draft Climate Change Bill alongside other developments such as the creation of the Office of Climate Change and requirements of the Climate Change and Sustainable Energy Act 2006 are broadly well designed and a far reaching responses to these issues
