in the European Union and the United States of America are examined and compared to the approach taken in the UK for the same crime to draw conclusions and make recommendations to improve the UK approach for future instances of benchmark manipulation The work fills an important gap in the literature by comparing and evaluating the laws and enforcement policies pertaining to the use of competition law in counteracting benchmark manipulation in the UK EU and US It argues that competition law is an effective enforcement tool when used in the financial services sector and that it provides regulators with a wide range of enforcement options when a breach of competition law is established The book will be a valuable resource for academics researchers and policymakers working in the areas of financial crime competition law comparative law and criminal justice Transnational Crime and Global Security Philip L. Reichel,Ryan Randa,2018-01-12

This two volume work offers a comprehensive examination of the distressing topics of transnational crime and the implications for global security National security is a key concern for individual nations regions and the global community yet globalism has led to the perfusion of transnational crime such that it now poses a serious threat to the national security of governments around the world Whether attention is concentrated on a particular type of transnational crime or on broader concerns of transnational crime generally the security issues related to preventing and combatting transnational crime remain of top priority concern for many governments Transnational Crime and Global Security has been carefully curated to provide students scholars professionals and consultants of criminal justice and security studies with comprehensive information about and in depth analysis of contemporary issues in transnational crime and global security The first volume covers such core topics as cybercrime human trafficking and money laundering and also contains infrequently covered but nevertheless important topics including environmental crime the weaponization of infectious diseases and outlaw motorcycle gangs The second volume is unique in its coverage of security issues related to such topics as the return of foreign terrorist fighters using big data to reinforce security and how to focus efforts that encourage security cooperation
