regardless of their zip codes or their school's average test scores. By embracing a shift away from the nation's myopic focus on standardized test scores, the program's focus is on inputs: access to equitable, exemplary policies and practices that students experience every school day, not outcomes. This follows from research findings that schools alone cannot fix the problems created by the stark inequalities in our society. Instead, schools should be expected to do their part by responding to inequities with research-based practices. The book features case studies of schools that demonstrate key criteria that other schools can emulate, such as an inclusive school climate, support for language-minority students, performance-based assessment, teacher professionalism, a commitment to detracking, and supports for students in need. Schools of Opportunity builds an argument for shifting the way that excellent public high schools are recognized and built. Book Features: Provides accounts of school reform jointly told by researcher-practitioner teams, connecting current research with successful efforts of educators to create outstanding learning environments. Brings together the voices of principals and school leaders who share stories of how their work has unfolded in their school district and state contexts. Identifies the school leadership and teacher practices that close opportunity gaps for student learning and what it takes to implement them. Contributors: Dwane Chapelle, Janet Eckerson, Lourenco Garcia, Matt Garcia, Kristen Goessling, Kimberly Grayson, Jill Gurtner, Ted Hamann, Ann Ishimaru, Mark Larson, Julie Mead, John Murphy, Jeannie Oakes, Jeff Palladino, Derek Pierce, Jenifer Rayne, Kellie Rolstad, Lorrie Shepard, Kate Somerville, Michelle Valladares, Kathryn Wiley.

The College Introductory Course in United States History

Jennings, Bryan Sanders, 1950. From World War to Cold War. David Reynolds, 2006-02-23. The 1940s was probably the most dramatic and decisive decade of the 20th century. This volume explores the Second World War and the origins of the Cold War from the vantage point of two of the great powers of that era: Britain and the USA, and of their wartime leaders, Churchill and Roosevelt. It also looks at their chequered relations with Stalin and at how the Grand Alliance crumbled into an undesired Cold War. But this is not simply a story of top-level diplomacy. David Reynolds explores the social and cultural implications of the wartime Anglo-American alliance, particularly the impact of nearly three million GIs on British life, and reflects more generally on the importance of cultural issues in the study of international history. This book persistently challenges popular stereotypes, for instance on Churchill in 1940 or his Iron Curtain speech. It probes clichés such as the special relationship and even the Second World War. And it offers new views of the familiar, such as the Fall of France in 1940 or Franklin Roosevelt as the wheelchair president. Incisive and readable, written by a leading international historian, these essays encourage us to rethink our understanding of this momentous period in world history. Emily 2.
