

Year 1		Western Adelaide Region - Maths Assessment Tasks Map (Draft - November 2013)				Pedagogical Strands	
Aims	The Australian Curriculum: Mathematics aims to ensure that students are confident, creative users and communicators of mathematics, able to investigate, represent and interpret mathematical problems and work, use various strategies, develop an increasing appreciation of understanding of mathematical concepts and fluency with processes, and are able to pose and solve problems and work in further and deeper, abstract and concrete, and logical and practical, recognise connections between the area of mathematics and other disciplines and appreciate mathematics as an accessible and enjoyable discipline (p.10).					• Understanding • Fluency • Problem Solving • Reasoning	
Content Strands	Number & Algebra						
Sub Strands	Number & Place Value			Fractions and Decimals	Money and Financial Mathematics	Patterns & Algebra	
Big Idea 1 Concept Key Understanding	Counting the Count		Place Value	Addition & Multiplication Thinking	Partitioning		
	Numbers are said in a particular order and there are patterns in the way we say them The teacher/pupil counts the whole many or few more A collection of whole many number what it looks like (ie. 1 apple, 4 pencils, 10 marbles) We can recognise small collections without counting (jumping) Collections can be measured, compared and classified (ie. as more, less, equal to... or between 5 and 10 marbles, different)	In place value we write numbers (ie. 10 ones is 1 ten, 10 tens is 1 hundred, ...) In place value there are names for thousands units (multiples of 10) (ie. tens, hundreds, thousands)	Numbers can be named in terms of their parts (part-part-whole, 7 is 6 and 1, 3 and 1, 4 and 3, ...) Numbers have properties that help us work fluently with them (eg. 7 is 5 and 2, 5 and 2 is 7, 10 and 1 is 9) Rounding and partitioning numbers is useful for mental and written calculation	The number of parts named (ie. part-whole, 2 parts-4 and 2, 1 part-whole) The fractions have equal parts Language is important (ie. 7 then 1 out of 2 apples, then half - how many out of how many)	Currency has different values and can be recognised and sorted according to appearance and value The size of Australian coins and notes do not determine their value Each country has its own currency Currency provides access to food and services	A pattern requires an element of repetition that can be described and generalised with symbols Patterns can be represented in many ways including using combinations of numbers, objects and symbols Patterns are all around us	
Australian Curriculum Content Descriptor	Develop confidence with number sequences to and from 100 by one from any starting point. Skip-count by 2s, 5s and 10s using their ten	Recognise, model, read, write and order numbers to at least 100. Locate these numbers on a number line	Count collections to 100 by partitioning numbers using place value	Represent and solve simple addition and subtraction problems using a range of strategies including counting on, partitioning and jumping parts	Recognise and describe one half as one of two equal parts of a whole	Recognise, describe and order Australian coins according to their value	Investigate and describe number patterns formed by skip counting and counting with objects
Learning Intent Standard	Students describe number sequences resulting from skip counting by 2s, 5s and 10s	Students read and write from 100 and locate numbers on a number line	Students partition numbers using place value	Students carry out simple additions and subtractions using jumping strategies	Students identify representations of one half	Students recognise Australian coins according to their value	Students continue simple patterns making numbers and objects
Curriculum Assessment Task	1.1 Number Chains		1.2 Mystery Number	1.3 On the Bus			1.4 Lucy's Books
