Mascle, 1998 The volume provides a modern synthesis of foreland basin stratigraphy and structural geology It covers the foothills and foreland basins of the northwestern Alps the Pyrenees and the Betic thrust belt The multidisciplinary approach includes both sedimentological and structural studies plus numerical modelling as a tool to quantify and integrate the geological data This book results from the Integrated Basin Studies Project which was funded by the European Commission

More than 200 researchers from 38 institutions in 15 countries have collaborated in the IBS project. Transforming Entrepreneurship Education Jantje Halberstadt, Antonieta Alcorta de Bronstein, Jean Greyling, Shaun Bissett, 2022-12-14. This open access book provides selected teaching approaches supporting methods, concrete examples of curricula as well as extracurricular teaching formats which are predominantly tailored to both African and German requirements. These approaches were developed by the YEEES Training and Research Centers, an international interdisciplinary network of university teachers and researchers from Germany and southern Africa, and combine the fields of management, entrepreneurship, information and communication technologies, ICT, and sustainability. The book shows how current scientific results can be integrated into teaching, how students can contribute to research while learning, and how research can contribute to the development and evaluation of new formats. It is thus relevant for university teachers, researchers, students, as well as practitioners who want to educate and act as future change agents.
