

OWNER'S MANUAL

Insertion Instructions

Before inserting the monitor, turn down the volume on your sound source and either drape the cord over your shoulders and down your back, or run the cord down in front. The monitors are marked with (R) and (L); (R) for the right ear, (L) for the left. If you have selected a foam eartip, compress the foam by rolling it between your fingers (fig. 1). With the body of the monitor toward the back of your ear and the cord facing forward, insert the eartip into your ear canal before the foam expands back to its original shape (fig. 2). If you have trouble inserting the monitor, reach over your head with your opposite hand and gently pull up and back on the top of your ear before inserting the eartip. This helps straighten your ear canal and may allow for easier insertion. The monitor cord should run over and behind your ear. Hold the monitor in place for 5 to 10 seconds to allow the foam to expand and conform to the shape of your ear canal (fig. 3).

IDENTIFY EARPICES
marked (R) for right and (L) for left

ALIGN EARPICES
at the ear canal, with cord facing forward & slightly downward

INSERT EARTIP
into ear canal and rotate eartip backwards & into position

Once the monitors and cords are comfortably in place, slide the cable zipper on the EPIC cable up to the base of your skull (not too snugly, as this may cause discomfort). This will limit cable movement and help ensure that your monitors stay in place during use. There is no zipper on the G2 cable with Apple control.

Cable Removal

HOLD
the earpiece and cable firmly with each hand

REMOVE
the cable by holding close to the connection and pulling at a straight angle from the socket. Do not pull from the wire!

Cable Replacement

CHECK
if the cable is for the left or right earphone

MATCH
the cable to the appropriate earphone

INSERT
the cable into the earphone by pushing directly into the socket
