Signs in the Dust Nathan Lyons, 2019-02-28 Modern thought is characterized by a dichotomy of meaningful culture and unmeaning nature *Signs in the Dust* uses medieval semiotics to develop a new theory of nature and culture that resists this familiar picture of things Through readings of Thomas Aquinas Nicholas of Cusa and John Poincaré John of St Thomas it offers a semiotic analysis of human culture in both its anthropological breadth as an enterprise of creaturely sign making and its theological height as a finite participation in the Trinity which can be understood as an absolute cultural nature *Signs in the Dust* then extends this account of human culture backwards into the natural depth of biological and physical nature It puts the biosemiotics of its medieval sources along with Félix Ravaisson's philosophy of habit into dialogue with the Extended Evolutionary Synthesis that is emerging in contemporary biology to show how all living things participate in semiosis so that that a cultural dimension is present through the whole order of nature and the whole of natural history It also retrieves Aquinas doctrine of intentions in the medium to show how signification can be attributed in a diminished way to even inanimate nature with the ontological implication that being as such should be reconceived in semiotic terms The phenomena of human culture are therefore to be understood not as breaks with a meaningless nature but instead as heightenings and deepenings of natural movements of meaning that long precede and far exceed us Against the modern divorce of nature and culture *Signs in the Dust* argues that culture is natural and nature is cultural through and through

Korsgaard, 2018-06-18 Christine M Korsgaard presents a compelling new view of humans moral relationships to the other animals She defends the claim that we are obligated to treat all sentient beings as

what Kant called ends in themselves Drawing on a theory of the good derived from Aristotle she offers an explanation of why animals are the sorts of beings for whom things can be good or bad She then turns to Kant's argument for the value of humanity to show that rationality commits us to claiming the standing of ends in ourselves in two senses Kant argued that as autonomous beings we claim to be ends in ourselves when we claim the standing to make laws for ourselves and each other Korsgaard argues that as beings who have a good we also claim to be ends in ourselves when we take the things that are good for us to be good absolutely and so worthy of pursuit The first claim commits us to joining with other autonomous beings in relations of moral reciprocity The second claim commits us to treating the good of every sentient creature as something of absolute importance Korsgaard argues that human beings are not more important than the other animals that our moral nature does not make us superior to the other animals and that our unique capacities do not make us better off than the other animals She criticizes the marginal cases argument and advances a new view of moral standing as attaching to the atemporal subjects of lives She criticizes Kant's own view that our duties to animals are indirect and offers a non utilitarian account of the relation between pleasure and the good She also addresses a number of directly practical questions whether we have the right to eat animals experiment on them make them work for us and fight in our wars and keep them as pets and how to understand the wrong that we do when we cause a species to go extinct

The Wisdom of Trees David Macauley, Laura Pustarfi, 2025-06-01 Pioneering essays that reveal the significance of new interdisciplinary understandings of trees and forests especially in terms of their philosophical and ecological dimensions and their importance for addressing the climate emergency This is the first book to apply philosophical thinking to trees Through a series of sixteen diverse essays by leading scholars and writers along with an in depth introduction to the key issues and ideas it examines the new and emerging understanding of trees in science and society Contributors show how these developments encourage a revisioning of philosophical thought and a more sustainable relationship with trees and forests a reconceptualization with important ecological and social implications for responding to deforestation the loss of biodiversity and the climate emergency The interdisciplinary contributions in this collection investigate the many interconnected dimensions of arboreality focusing on subjects related to time mind truth memory being beauty goodness silence wisdom personhood and death The volume engages in a conversation about why trees matter how they can best be protected our obligations to them and even what or who they are Most of the chapters are informed by natural history or ecological science and many share a particular emphasis on continental philosophy and the environmental humanities
