The Art of Public Space Kim Gurney, 2016-01-05 A journey through Johannesburg via three art projects raises intriguing notions about the constitutive relationship between the city imagination and the public sphere through walking gaming and performance art Amid prevailing economic validations the trilogy posits art within an urban commons in which imagination is all important **Translation Studies beyond the Postcolony** Ilse Feinauer, Kobus Marais, 2017-01-06 This edited volume explores the role of postcolonial translation studies in addressing issues of the postcolony It investigates the retention of the notion of postcolonial translation studies and whether one could reconsider or adapt the assumptions and methodologies of postcolonial translation studies to a new understanding of the postcolony to question the impact of postcolonial translation studies in Africa to address pertinent issues The book also places the postcolony in historical perspective and takes a critical look at the failures of postcolonial approaches to translation studies The book brings together 12 chapters which are divided into three sections namely Africa the Global South and the Global North As such the volume is able to consider the postcolony and even conceptualisations beyond the postcolony in a variety of settings worldwide *The Oxford Handbook of Ellipsis* Jeroen van Craenenbroeck, Tanja Temmerman, 2018-12-13 This Handbook is the first volume to provide a comprehensive in depth and balanced discussion of ellipsis phenomena whereby the meaning of an utterance is richer than would be expected based solely on its linguistic form Natural language abounds in these apparently incomplete expressions such as I laughed but Ed didn't in which the final portion of the sentence the verb laugh remains unpronounced but is still understood The range of phenomena involved raise general and fundamental questions about the workings of grammar but also constitute a treasure trove of fine grained points of inter and intralinguistic variation The volume is divided into four parts In the first authors examine the role that ellipsis plays and how it is analysed in different theoretical frameworks and linguistic subdisciplines such as HPSG construction grammar inquisitive semantics and computational linguistics Chapters in the second part highlight the usefulness of ellipsis as a diagnostic tool for other linguistic phenomena

including movement and islands and codeswitching while part III focuses instead on the types of elliptical constructions found in natural language such as sluicing gapping and null complement anaphora Finally the last part of the book contains case studies that investigate elliptical phenomena in a wide variety of languages including Dutch Japanese Persian and Finnish Sign Language

Working with indigenous knowledge Fhumulani M. Mulaudzi, Rachel T. Lebesse, 2022 The aim of the book is to assist both local and international scholars in articulating the scholarly discourse on indigenous health attitudes practices and experiences The indigenous lens that was used to generate and disseminate indigenous knowledge in this book will strengthen indigenous scholarship thus making it accessible to a wider audience In addition the information shared in this book will add value for scholars and assist them with the indigenous knowledge needed to address sustainable development goals This book is timeous and topical as the discourse on the decolonisation of the curriculum is widely debated in the higher education space The discourse on the scholarship of indigenous knowledge as the tacit local knowledge that stems from cultural practices within communities has not been well articulated in the current health science education milieu Indigenous knowledge has remained overlooked and undermined for a very long time and the information remains untapped in local communities The scholars who conducted the research on which this book is based unearthed a wealth of knowledge which was tacit in nature and translated it into implicit knowledge that can be documented and shared with other scholars globally This knowledge will assist health care scholars in benefiting from knowledge practices and cultural beliefs that will assist them in health care planning teaching evidence based practice and further research
