In this book, Merridy Wilson Strydom applies the capabilities approach to better understand university access and participation and draws on a rich case study from South Africa to critically and innovatively explore the complex and contradictory terrain of access with success. The book integrates quantitative and qualitative research with theory and practical application to provide a new framework for considering and improving the transition from school to university. *University Access and Success* will appeal to academics and researchers in the field of higher education internationally. South Africa is characterised by a youthful population and the challenges and possibilities that characterise the young generation are both warning signs and beacons of hope for a nation founded on social justice. Youth in South Africa Agency in visibility and national development takes stock of the nation's development as it affects young people. Authors offer both personal and professional insights into the ways in which the youth navigate their own pathways to adulthood. These include formal and informal engagements with politics as well as protest, unemployment, entrepreneurship, education, religion, experiences with sexuality and violence and a multitude of other life experiences. Contributors paint a picture of the initiative, agency and resilience of the youth as well as the challenges before them. Authors also identify the state of wait-hood faced by those unable to make the transition out of youth into full adulthood as a result of their socio-economic circumstances and political context. By engaging these experiences and insights and primarily informed by the inputs of young people, the authors highlight the limitations of existing youth policies and frameworks. The case is made for policy instruments to be informed by the lived experiences of the youth as they navigate a complex macrosocial environment and by the messages the youth communicate about the limitations of current approaches. **Students with Disabilities and the Transition to**
