

BIOLOGY NOTES

Characteristics of Living Organisms

In order to identify living organisms, scientists listed 7 characteristics which all living organisms have:

1. Nutrition:

Taking in nutrients which are organic substances and mineral ions, containing raw materials and energy for growth and tissue repair, absorbing and assimilating them.

2. Excretion:

Removal from organisms of toxic materials, the waste products of metabolism and substances in excess.

3. Respiration:

Chemical reactions that break down nutrient molecules in living cells to release energy.

4. Sensitivity:

The ability to detect or sense changes in the environment and to make responses.

5. Reproduction:

Processes that make more of the same kind of organism.

6. Growth:

The permanent increase in size and dry mass by an increase in number of cells, cell size, or both.

7. Movement:

An action by an organism or part of an organism that changes position or place.

The seven characteristics could be memorized by the term "Mrs. Gren".

Case Studies in Human Ecology Daniel G. Bates,Sarah H. Lees,2013-06-29 This volume was developed to meet a much noted need for accessible case study material for courses in human ecology cultural ecology cultural geography and other subjects increasingly offered to fulfill renewed student and faculty interest in environmental issues The case studies all taken from the journal Human Ecology An Interdisciplinary Journal represent a broad cross section of contemporary research It is tempting but inaccurate to suggest that these represent the Best of Human Ecology They were selected from among many outstanding possibilities because they worked well with the organization of the book which in turn reflects the way in which courses in human ecology are often organized This book provides a useful sample of case studies in the application of the perspective of human ecology to a wide variety of problems in different regions of the world University courses in human ecology typically begin with basic concepts pertaining to energy flow feeding relations material cycles population dynamics and ecosystem properties and then take up illustrative case studies of human environmental interactions These are usually discussed either along the lines of distinctive strategies of food procurement such as foraging or pastoralism or as adaptations to specific habitat types or biomes such as the circumpolar regions or arid lands

Human and Environmental Security in the Era of Global Risks Mohamed Behnassi,Himangana Gupta,Olaf Pollmann,2018-10-24 This book discusses ways to deepen the debate on the linkages between global risks and human and environmental security The approach put forward in this book is one of questioning the ability of existing concepts regulatory frameworks technologies and decision making mechanisms to accurately deal with emerging risks to human and environmental security and to act in the direction of effectively managing their impacts and fostering the resilience of concerned systems and resources Empirical research findings from Africa Asia and the Pacific Islands are provided During the last decades the links between emerging risks and the security of humans and nature have been the object of considerable research and deliberations However it is only recently becoming an important focus of policy making and advocacy In this contributed volume it is presumed that the ability or lack thereof to make innovative conceptual frameworks institutional and policy arrangements and technological advances for managing the current emerging risks will foster or undermine the environmental security and consequently determine the future human security Moreover taking into account the links between environmental climate security human security and sustainability will help frame a new research agenda and potentially develop a broad range of responses to

many delicate questions **The Life and Social Vision of Oliver Mtukudzi** Munyaradzi Mawere, Benjamin Mudzanire, Kizito Muchemwa, 2025-05-27 This compelling book offers a biographical and critical analysis of Oliver Tuku Mtukudzi 1953 2019 a towering music icon of Zimbabwe and Africa Uniquely Tuku achieved global recognition from his homeland his music a powerful reflection on both local and universal human issues Divided into four sections the book traces the socio cultural roots of his distinctive sound exploring the influence of rural Dande and Highfield Township often overlooked colonial era spaces on his artistic vision It further examines his socio cultural impact revealing how his music preserved cultural memory addressed socio political injustices and amplified marginalized voices Finally the book delves into Tuku s artistic virtuosity demonstrating his fusion of Korekore sounds into a cosmopolitan style that engaged with transnational themes Drawing on diverse scholarly perspectives this accessible anthology is ideal for students and scholars across musicology theatre arts literature history social anthropology media cultural studies and African studies

Resources in education ,1991 *Women Agency, Culture, and Crime in Education* Phinias Tafirei, 2023-12-08 In the recent times women agency in African circles has become a contested issue with some arguing that women in African traditional societies lack agentic power including the power to make independent decision The issue has become even more contested in education where culture meets face to face with agency in all its forms In an attempt to get to the bottom of the subject in question this book examines using empirical data from the field an often hidden crime acquaintance rape which for many years has been allowed to spread its tentacles in Africa s institutions of higher education This is to say acquaintance rape has been practised unconsciously in many cultures thereby undermining the agentic power of women in these cultures The book adopts institutions of higher education in Masvingo Province heretofore referred to as Masvingo of Zimbabwe to assess factors affecting students in higher education s perceptions of acquaintance rape The population for this book consisted of students educators and other staff members in institutions of higher education in Masvingo The book reveals that culture gender peer pressure policy and legislation or law affect higher education students perceptions of acquaintance rape The book also establishes that college authorities non academic staff and students have inadequate knowledge of how to effectively manage or deal with acquaintance rape cases due to inadequate policies legislations or laws governing students behaviour in higher education A model to reduce acquaintance rape is proposed It recommends that all institutions of higher education should introduce acquaintance rape prevention and reduction programmes peer education programmes acquaintance rape reduction techniques and acquaintance in the curriculum

Serengeti II A. R. E. Sinclair, Peter Arcese, 1995-08 Serengeti II Dynamics Management and Conservation of an Ecosystem brings together twenty years of research by leading scientists to provide the most thorough understanding to date of the spectacular Serengeti Mara ecosystem in East Africa home to one of the largest and most diverse populations of animals in the world Building on the groundwork laid by the classic Serengeti Dynamics of an Ecosystem published in 1979 by the University of Chicago Press this

new book integrates studies of the ecosystem at every level from the plants at the bottom of the visible food chain to the many species of herbivores and predators to the system as a whole Drawing on new data from many long term studies and from more recent research initiatives and applying new theory and computer technology the contributors examine the large scale processes that have produced the Serengeti s extraordinary biological diversity as well as the interactions among species and between plants and animals and their environment They also introduce computer modeling as a tool for exploring these interactions employing this new technology to test and anticipate the effects of social political and economic changes on the entire ecosystem and on particular species and so to shape future conservation and management strategies

Planning for Woodcarving in the 21st Century *Bibliography of Agriculture with Subject Index* ,1993 **Human Rights**

and the Third World Subrata Sankar Bagchi, Arnab Das, 2012-12-06 Human Rights and the Third World Issues and Discourses deals with the controversial questions on the universalistic notions of human rights It finds Third World perspectives on human rights and seeks to open up a discursive space in the human rights discourse to address unresolved questions citing issues and problems from different countries in the Third World 1 Whether alternative perspectives should be taken as the standard for human rights in the Third World countries 2 Should there be a universalistic notion of rights for Homo sapiens or are we talking about two diametrically opposite trends and standards of human rights for the same species 3 How far these Third World perspectives of human rights can ensure the protection of the minorities and the vulnerable sections of population particularly the women and children within the Third World 4 Can these alternative perspectives help in fighting the Third World problems like poverty hunger corruption despotism social exclusion like the caste system in India communalism and the like 5 Can there be reconciliation between the Third World perspectives and the Western perspective of human rights **The Mammals of the Southern African Sub-region** J. D. Skinner, Christian T. Chimimba, 2005-11-15

This comprehensive volume covers all mammals that occur naturally on the African mainland south of the Cunene and Zambezi rivers and also in the subregion's coastal waters Extensively revised and updated for the new edition it now includes the latest data from mammal research in southern Africa along with the radical taxonomic changes across all levels of mammalian classification Containing contributions from specialists on each mammalian order each species description has been reviewed by a range of independent and internationally recognised authorities Along with the latest taxonomic information the distribution maps and illustrations have been updated and redrawn several new colour plates have been added and the whole design has been enhanced to aid access to key information This is the most comprehensive and up to date survey of southern African mammals and forms an essential reference for zoologists evolutionary biologists and anyone wanting an overview of the region's wildlife *Cambridge Economics in the Post-Keynesian Era* Ashwani Saith, 2022-11-11

This book chronicles the rise and especially the demise of diverse revolutionary heterodox traditions in Cambridge theoretical and applied economics investigating both the impact of internal pressures within the faculty as also the power of external ideological and political forces unleashed by the global dominance of neoliberalism Using fresh archival materials personal interviews and recollections this meticulously researched narrative constructs the untold story of the eclipse of these heterodox and post Keynesian intellectual traditions rooted and nurtured in Cambridge since the 1920s and the rise to power of orthodox mainstream economics Also expunged in this neoclassical counter revolution were the structural and radical policy oriented macro economic modelling teams of the iconic Department of Applied Economics along with the atrophy of sociology development and economic history from teaching and research in the self purifying faculty This book will be of particular interest to researchers in the history of economic thought sociology of knowledge political economy

especially those engaged in heterodox and post Keynesian economics and to everyone wishing to make economics fit for purpose again for negotiating the multiple economic social and environmental crises rampant at national and global levels

Christianity and Ecological Theology E. M. Conradie, 2006-10-01 There has been a proliferation of publications in the field of Christian ecological theology over the last three decades or so These include a number of recent edited volumes each covering a range of topics and consolidating many of the emerging insights in ecological theology The call for Christian churches to respond to the environmental crisis has been reiterated numerous times in this vast corpus of literature also in South Africa

Wildlife Conservation by Sustainable Use H.H.T Prins, Jan Geu Grootenhuys, Thomas T. Dolan, 2012-12-06 One of the major challenges of sustainable development is the interdisciplinary nature of the issues involved To this end a team of conservation biologists hunters tourist operators ranchers wildlife and land managers ecologists veterinarians and economists was convened to discuss whether wildlife outside protected areas in Africa can be conserved in the face of agricultural expansion and human population growth They reached the unequivocal if controversial conclusion that wildlife can be an economic asset especially in the African savannas if this wildlife can be sustainably utilized through safari hunting and tourism Using the African savannas as an example *Wildlife Conservation by Sustainable Use* shows that in many instances sustainable wildlife utilization comprises an even better form of land use than livestock keeping Even when population pressure is high as in agricultural areas or in humid zones and wild animal species can pose a serious cost to agriculture these costs are mainly caused by small species with a low potential for safari hunting Although ranching has a very low rate of return and is hardly ever profitable the biggest obstacle to the model of sustainable wildlife use outlined in *Wildlife Conservation by Sustainable Use* is from unfair competition from the agricultural sector such as subsidies and lack of taxation resulting in market distortion for wildlife utilization This book thus gives valuable evidence for a different way of working providing arguments for removing such distortions and thereby facilitating financially sound land use and making it a rationally sound choice to conserve wildlife outside protected areas The expert team of authors most of whom came together at a workshop to thrash out the ideas that were then developed into the various chapters has written a superb account of recent research on this complex subject resulting in a book that is a major contribution to our understanding of sustainable use of land The important conclusion is that wildlife conservation can be possible for landholders and local communities if they have a financial interest in protecting wildlife on their lands

Social Change and Development, 1993 Perspectives on Africa Roy Richard Grinker, Stephen C. Lubkemann, Christopher B. Steiner, 2010-05-17 The second edition of *Perspectives on Africa* A Reader in Culture History and Representation is both an introduction to the cultures of Africa and a history of the interpretations of those cultures Key essays explore the major issues and debates through a combination of classic articles and the newest research in the field Explores the dynamic processes by and through which scholars have described and understood African history and culture Includes selections from anthropologists historians

philosophers and critics who collectively reveal the interpenetration of ideas and concepts within and across disciplines regions and historical periods Offers a combined focus on ethnography and theory giving students the means to link theory with data and perspective with practice Newly revised and updated edition of this popular text with 14 brand new chapters and two new sections Conflict and Violent Transformations and Development Governance and Globalization Endemic Species Eusebio Cano Carmona, Carmelo Maria Musarella, Ana Cano Ortiz, 2019-12-18 This book consists of several thematic groups including botany zoology and topics related to human health In regards to botany chapters discuss endemic plants of Bolivia Mexico Italy and the Caribbean They show the diversity distribution and conservation of many species In regards to zoology the book highlights endemic primates and reptiles Additionally the book presents other environmental issues relevant to conservation This volume also presents topics related to health some of which are relevant for their implications on health and the economy is the case of the presence of toxins in the Pacific plankton All chapters present relevant content for future research or because they are fundamental for territorial management
