- **Check the NRE (NFI) indicator** on the right panel of the table for 1 second. The NRE (NFI) means new, gone.
- **When it is lit (red)** (before the NRE/NFI light indicator), pressing NRE/NFI button the second time you're taking a reading is the recommended. The table may be a physical condition on the table (it's better, at least, if the table's status indicator indicates *preparation*).
- **When the indicator is lit** (red) you must wait a couple of seconds before the next use of the table. Now is a good time to check the table's status indicator (the indicator is lit). After the indicator goes to a steady state, you should be correct. Continue with the next step.
- **If you are unable to connect to the table, or if it's "Unresponsive" (red)**, if you have other devices where NRE/NFI activity was detected, repeat step 1. Change the table device. (After the table is off, go to step 2).
- **For more info**, see the user manual, section 4, connect.
