

Professional Integrated SSL-VPN Appliance for Small and Medium-sized businesses

Benefits

Clientless Secure Remote Access

The ZyWALL SSL 10 is an integrated SSL-VPN appliance designed for small and medium-sized organizations with simple, secure and clientless remote access to the resources on corporate networks.

Remote access has never been so easy since no client software is required on users' laptops. They are enabled to access corporate applications or shared files with just standard Web browsers, no pre-installed or pre-configured VPN software is needed. Better yet, administrators can reduce the costly support tasks involved in deploying, configuring and updating VPN software.

Highly Integrated Capabilities on Existing Network Infrastructure

The ZyWALL SSL 10 fits seamlessly into any network topology and can be easily deployed alongside almost any third-party firewall as a secure remote access solution. This enables you to leverage the existing network infrastructure without the need to purchase additional hardware. When deployed alongside a ZyWALL UTM running Anti-Virus and IDP Service, the ZyWALL SSL 10 utilizes the powerful UTM technology to scan traffic for malicious threats such as viruses, worms, Trojans and spyware.

Comprehensive End-User Authentication Mechanism

The ZyWALL SSL 10 supports not only the internal database, but also various backend user repositories such as Microsoft Active Directory, LDAP and RADIUS to seamlessly integrate with the existing user database. ZyWALL SSL 10 supports the Two-factor Authentication method that requires two independent pieces of information to recognize identity and grant privileges. Two-factor Authentication is stronger and more rigorous than the traditional password authentication that requires only one factor (the user password), and it is especially useful for protecting against threats from keylogger programs.

ZyWALL-SSLVPN SecuExtender Technology

ZyWALL SSL 10 provides powerful capability to seamlessly access any corporate network resource by transparently pushing a downloadable thin client (ZyWALL-SSLVPN SecuExtender) to users' desktops or laptops. Administrators can allow specific user groups (such as employees) to create IPSec-like network tunnels for accessing any resource, while other user groups (such as customers, vendors or partners) may access restricted applications and resources listed only on the user portal.
