

## Outline of the Toulmin Model

- I. Claim—assertion, thesis, conclusion to be established
  - A. Contains topic plus controlling idea
  - B. Signaled by words like ought to, must, it is essential
- II. Grounds—evidence, reasons, support
  - A. Deductive—premises from which a claim is derived
  - B. Inductive—sample, experiment, observation
- III. Warrants—why the reasons support the claim; principles or assumptions
  - A. Deductive—meanings of terms, parallel argument
  - B. Inductive—representative sample
  - C. A generalization of why the evidence supports the claim.
- IV. Backing—implicit assumptions that show the warrant is reliable and/or evidence to support grounds
- V. Modal Qualifiers
  - A. Words like probably, in most instances, typically—they show when, how, and why the claim is reliable
- VI. Rebuttals—counterarguments or exceptions to the claim

### Example:

*Claim:* After school jobs create a negative experience for teens because they conflict with the essential goal of success in academics.

*Grounds:* Explanation that study time is essential to successful academic performance

*Warrants:* Explanation of importance of academics versus moneymaking for teens, using information provided by the grounds

*Backing:* Studies of a decline in academic performance once students take on an after-school job; testimonies of students, parents, and teachers

*Modal Qualifiers:* Most (Many, Some, Often, Usually) teens do not have enough spare time to succeed at both a job and school.

*Rebuttals:* After school jobs create a positive experience for teens because they teach the values of responsibility and time management.

## **Toulmin Model Paper:**

**Arguing on the Toulmin Model** David Hitchcock, Bart Verheij, 2007-01-24 Summarizing in The Uses of Argument Toulmin emphasized a number of points that are by now familiar but still deserve attention 1 Reasoning and argument involve not only support for points of view but also attack against them 2 Reasoning can have qualified conclusions 3 There are other good types of argument than those of standard formal logic 4 Unstated assumptions linking premisses to a conclusion are better thought of as inference licenses than as implicit premisses 5 Standards of reasoning can be field dependent and can be themselves the subject of argumentation Each of these points is illustrated by his layout of arguments The rebuttal illustrates the first point the qualifier the second point and the warrant and backing the last three points 2 RECEPTION OF TOULMIN S BOOK As Toulmin himself notes in his essay in this volume which was delivered as an address in 2005 his fellow philosophers were initially hostile to the ideas in his book They were taken up however by specialists in fields like jurisprudence and psychology who found that they fit the forms of argument and reasoning that they were studying And Toulmin s model was embraced by the field of speech communication in the United States whose textbooks on argumentation now include an obligatory chapter on the Toulmin model of micro arguments Teaching Academic Writing in European Higher Education Lennart Björk, Gerd Bräuer, L. Rienecker, Peter Stray Jörgensen, 2005-12-30 DAVID R RUSSELL English Department of Iowa State University U S A I was fortunate to attend as a visitor from the U S the first European Association for the Teaching of Academic Writing EATAW conference in 2001 at Groningen I was struck by the similarities in the challenges higher education faces on both sides of the Atlantic in terms of developing students academic writing and students learning through writing It is indeed an international problem But I was equally struck by the profound differences in responding to these challenges among nations institutions disciplines and even within disciplines The essays in this extraordinary volume address a growing demand for help with academic writing on the part of students and academic staff alike And they do so in ways that bring fresh approaches not only to Europeans who have only recently begun to study academic writing but also to researchers and academic staff in the U S where we have a century old tradition of attention to the problem but are much in need of these fresh approaches Academic writing has become a problem in higher education all around the world because higher education sits smack between two contradictory pressures On one end far more students and far more diverse students come streaming into higher education bringing in a far greater diversity of linguistic resources often interpreted as standards are falling as Frank Haacke Tente point out **Argument Structure:** James B. Freeman, 2011-03-23 This monograph first presents a method of diagramming argument macrostructure synthesizing the standard circle and arrow approach with the Toulmin model A theoretical justification of this method through a dialectical understanding of argument a critical examination of Toulmin on warrants a thorough discussion of the linked convergent distinction and an account of the proper reconstruction of enthymemes follows *The Rhetoric of Western Thought* James L.
