Thanatourism and Cinematic Representations of Risk Rodanthi Tzanelli, 2016-04-14 In today's world the need to eliminate natural and human made disasters has been at the forefront of national and international socio political agendas The management of risks such as terrorism labour strikes protests and environmental degradation has become pivotal for countries that depend on their economy's tourist sector Indeed there is fear that the end of tourism might be nigh due to inadequate institutional foresight Yet in designing relevant policies to tackle this arts such as that of filmmaking have yet to receive due consideration This book adopts an unorthodox approach to debates about the end of tourism Through twenty first century cinematic narratives of symbolically interconnected risks it considers how art envisages the future of humanity's well being These risks include migration as an infectious disease alien incursions as racialized labour mobilities cyborg rebellion as the fear of post colonial otherness and

zombie anthropophagy as the replacement of rooted identities by nomadic lifestyles Such filmic scenarios articulate the futuristic survival of community as the triumph of the technological human over otherness and provide a means to debate societal risks that weave identity politics into unequal mobilities This book will appeal to researchers and students interested in mobilities theory tourism and travel theory film studies and aesthetics globalisation studies race labour and migration

The Gateway to the Pacific Meredith Oda, 2019-01-03 In the decades following World War II municipal leaders and ordinary citizens embraced San Francisco's identity as the Gateway to the Pacific using it to reimagine and rebuild the city The city became a cosmopolitan center on account of its newfound celebration of its Japanese and other Asian American residents its economy linked with Asia and its favorable location for transpacific partnerships The most conspicuous testament to San Francisco's postwar transpacific connections is the Japanese Cultural and Trade Center in the city's redeveloped Japanese American enclave Focusing on the development of the Center Meredith Oda shows how this multilayered story was embedded within a larger story of the changing institutions and ideas that were shaping the city

During these formative decades Oda argues San Francisco's relations with and ideas about Japan were being forged within the intimate local sites of civic and community life. This shift took many forms including changes in city leadership, new municipal institutions and especially transformations in the built environment. Newly friendly relations between Japan and the United States also meant that Japanese Americans found fresh if highly constrained job and community prospects just as the city's African Americans struggled against rising barriers. San Francisco's story is an inherently local one but it also a broader story of a city collectively if not cooperatively reimagining its place in a global economy.

Renewing Cities Ross J. Gittell, 2014-07-14. The cities of Lowell and New Bedford in Massachusetts, Jamestown in New York and McKeesport in Pennsylvania have all undergone years of adversity and decline, their economic bases having been badly damaged by structural changes in the national economy, particularly in the manufacturing sector. In situations like these, can local development efforts make a difference? Ross Gittell answers in the affirmative. This interdisciplinary work focuses on comparative case studies of the four cities. The book reveals how public, private and community-based local economic development initiatives affect local economic performance: what works and what does not work. City leaders and institutions can help reorganize and reshuffle local resources with results that include increased investment, greater effort by local individuals and institutions, more cooperation among different development interests and improvement in city economic positioning relative to the regional economy and local development cycles. Gittell emphasizes the possibility of shifting from a zero-sum game, attracting jobs from elsewhere, toward the goal of converting underutilized local resources to higher value uses through alternative forms of economic and political organization.
