

World History Module 1

Activity 1

1. What did Aristotle (and his other contemporaries) believe about the Earth's shape? Why?

Many people believe that Earth is a flat-disk and anyone who went too close to the edge would likely fall. That time exploration is an adventure to unknown mysteries.

2. What were the first scientific theories about the creation of the universe and the Earth?

According to Pierre Laplace (1749-1827) planets were formed by the rapid swirling of a massive gas-cloud which shrank and became dense due to gravitational forces also known as the "Nebular Hypothesis". James Janes (1877-1946) believed that planets were formed when another star passes close to the sun. The gravitational force of this passing star pulled off pieces from our sun which separated and cooled to form planets or the "Tidal Theory".

3. Explain the "Big Bang Theory" Why is this theory more acceptable to modern scientists?

The most accepted theory of creation of the universe at present is the widely known as the "Big Bang Theory" according to this theory the universe was formed after a huge explosion which took place 15 to 20 billion years ago. This explosion scattered far and wide the basic ingredients or atoms (electron, neutrons and protons) after many geological phenomenon eventually created the sky, land and seas.

Activity 2

1. How did the Pre-Cambrian Period last? What developments took place during this period?

The Pre-Cambrian period started four billion years ago up to 570 million years ago. And during this period appeared first life forms, simple organisms like "protozoa" composed of a single cell and cannot be seen with the naked eye and other only multi-cellular life forms. These were followed by the first plants, blue and green moss which appeared whenever water was to be found.

2. What are the periods of Paleozoic Era?

The Paleozoic Era is divided into six periods namely the Cambrian, Ordovician, Silurian, Devonian, Carboniferous, and Permian.

3. How long the Mesozoic Era last? Into what periods this era divided?

The Mesozoic Era lasted from 225 mya to 65 mya also known as age of dinosaurs. This era is divided into three periods: the Triassic, Jurassic, and Cretaceous.

Dynamics of World History Christopher Dawson,2014-05-20 In scope and in vision Christopher Dawson s historiography ranks with the work of men like Spengler Northrop and Toynbee Several major themes run through Dawson s work but perhaps his most unique contribution was his insistence on the importance of religion in shaping and sustaining civilizations Religion Dawson believed is the great creative force in any culture and the loss of a society s historic religion therefore portends a process of social dissolution For this reason Dawson concluded that Western society must find a way to revitalize its spiritual life if it is to avoid irreversible decay Progress the real religion of modernity is insufficient to sustain cultural health And an ahistorical secularized Christianity is an oxymoron a pseudo religion only nominally related to the historic religion of the West Dawson maintained that the hope of the present age lay in the reconciliation of the religious tradition of Christianity with the intellectual tradition of humanism and the new knowledge about man and nature provided by modern science *Dynamics of World History* shows that though such a task may be difficult it is not impossible History Teacher's Magazine ,1914 The World's Cyclopedia of Science ,1883 *Western Civilization: A Global and Comparative Approach* Kenneth L. Campbell,2014-12-18 Featuring the one author one voice

approach this text is ideal for instructors who do not wish to neglect the importance of non Western perspectives on the study of the past The book is a brief affordable presentation providing a coherent examination of the past from ancient times to the present Religion everyday life and transforming moments are the three themes employed to help make the past interesting intelligible and relevant to contemporary society **The American Jewish Chronicle** ,1917 **Ancient Pakistan - An Archaeological History** Mukhtar Ahmed,2014-05-29 Ancient Pakistan An Archaeological History deals with the prehistory of Pakistan from the Stone Age to the end of the Indus Civilization This particular volume The Stone Age concerns with the first appearance of man in northern Pakistan more than a million years ago and traces his cultural history up to the emergence of agriculture and sedentary living in this region The book is written for students of ancient history anthropology and archaeology The material is generously illustrated with a large number of maps tables drawings and colored photographs Each Section is provided with extensive references to the text and a comprehensive bibliography is provided for those who want to dig deeper into the subject Although the book primarily deals with the Greater Indus Valley its scope is much wider the subject has been discussed in context with the paleolithic of India Central Asia and Iran The story of human evolution provides a constant background *Cargoes from Three Continents* Marie Cleary,Mark J.
