Evolution: A Big History Perspective Leonid E. Grinin,Andrey V. Korotayev,Barry H. Rodrigue,2011-09-29 This issue of the almanac aims at filling the gap in the mega evolutionary research The Editors believe that the present Almanac which brings together scientists working in different areas of the vast evolutionary field will hopefully make a contribution to this process The contributions to this volume are subdivided into three sections Universal Evolution Biological and Social Forms of Evolution Connections and Comparisons and Aspects of Social Evolution Subjects and issues of the contributions to all three sections have a great deal in common and significantly supplement each other *Global History, Globally* Sven Beckert,Dominic Sachsenmaier,2018-02-22 In recent years historians in many different parts of the world have sought to transnationalize and globalize their perspectives on the past Despite all these efforts to gain new global historical visions however the debates surrounding this movement have remained rather provincial in scope Global History Globally addresses this lacuna by surveying the state of global history in different world regions Divided into three distinct but tightly interweaved sections the book s chapters provide regional surveys of the practice of global history on all continents review some of the research in four core fields of global history and consider a number of problems that global historians have contended with in their work The authors hail from various world regions and are themselves leading global historians Collectively they provide an unprecedented survey of what today is the most dynamic field in the discipline of history As one of the first books to systematically discuss the international dimensions of global historical scholarship and address a wealth of questions emanating from them Global History Globally is a must read book for all students and scholars of global history

Agricultural Transformation in a Global History Perspective Ellen Hillbom,Patrick Svensson,2013-03-05 History teaches us that agricultural growth and development is necessary for achieving overall better living conditions in all societies Although this process may seem homogenous when looked at from the outside it is full of diversity within This book captures this diversity by presenting eleven independent case studies ranging over time and space By comparing outcomes attempts are made to draw general conclusion and lessons about the agricultural transformation process **Southeast Asia in World History** Craig Lockard,2009-04-24 Here is a brief well written and lively survey of the history of Southeast Asia from ancient times to the present paying particular attention to the region s role in world history and the distinctive societies that arose in lands shaped by green fields and forests blue rivers and seas Craig Lockard shows how for several millennia

Southeast Asians living at the crossroads of Asia enjoyed ever expanding connections to both China and India and later developed maritime trading networks to the Middle East and Europe. He explores how the people of the region combined local and imported ideas to form unique cultures reflected in such striking creations as Malay sailing craft, Javanese gamelan music and batik cloth, classical Burmese and Cambodian architecture and social structures in which women have often played unusually influential roles. Lockard describes colonization by Europeans and Americans between 1500 and 1914, tracing how the social, economic and political frameworks inherited from the past combined with active opposition to domination by foreign powers enabled Southeast Asians to overcome many challenges and regain their independence after World War II. The book also relates how Malaysia, Singapore, Thailand, Indonesia and Vietnam are now among the fastest growing economies in the world and play a critical role in today's global marketplace.

Sexuality in World History Peter N.

Stearns, 2017-02-14 This book examines sexuality in the past and explores how it helps explain sexuality in the present. The subject of sexuality is often a controversial one and exploring it through a world history perspective emphasizes the extent to which societies including our own are still reacting to historical change through contemporary sexual behaviors, values and debates. This new edition examines these issues on a global scale with attention to anthropological insights on sexuality and their relationship to history, the dynamics between sexuality and imperialism, sexuality in industrial society and trends and conflicts surrounding views of sex and sexuality in the contemporary world.

Teaching World History in the

Twenty-first Century: A Resource Book Heidi Roupp, 2015-02-12 This practical handbook is designed to help anyone who is preparing to teach a world history course or wants to teach it better. It includes contributions by experienced teachers who are reshaping world history education and features new approaches to the subject as well as classroom tested practices that have markedly improved world history teaching.

The New World History Ross E. Dunn, Laura J. Mitchell, Kerry

Ward, 2016-08-23 The New World History is a comprehensive volume of essays selected to enrich world history teaching and scholarship in this rapidly expanding field. The forty-four articles in this book take stock of the history, evolving literature and current trajectories of new world history. These essays together with the editors' introductions to thematic chapters encourage educators and students to reflect critically on the development of the field and to explore concepts, approaches and insights valuable to their own work. The selections are organized in ten chapters that survey the history of the movement, the seminal ideas of founding thinkers and today's practitioners, changing concepts of world historical space and time, comparative methods, environmental history, the big history movement, globalization, debates over the meaning of Western power and ongoing questions about the intellectual premises and assumptions that have shaped the field.
