Shaping Jazz Damon J. Phillips, 2013-07-21 There are over a million jazz recordings but only a few hundred tunes have been recorded repeatedly Why did a minority of songs become jazz standards Why do some songs and not others get rerecorded by many musicians Shaping Jazz answers this question and more exploring the underappreciated yet crucial roles played by initial production and markets in particular organizations and geography in the development of early twentieth century jazz Damon Phillips considers why places like New York played more important roles as engines of diffusion than as the sources of standards He demonstrates why and when certain geographical references in tune and group titles were considered more desirable He also explains why a place like Berlin which produced jazz abundantly from the 1920s to early 1930s is now on jazz's historical sidelines Phillips shows the key influences of firms in the recording industry including how record companies and their executives affected what music was recorded and why major companies would rerelease recordings under artistic pseudonyms He indicates how a recording's appeal was related to the narrative around its creation and how the identities of its firm and musicians influenced the tune's long run popularity Applying fascinating ideas about market emergence to a music's commercialization Shaping Jazz offers a unique look at the origins of a groundbreaking art form

Robert Heller,2022-10-06 Seminar paper from the year 2020 in the subject History of Germany Postwar Period Cold War grade 1-7 University of Applied Sciences Zwickau Fakult t Sprachen language English abstract There are very few times in history when a country got itself to a place of economic wealth like post war Germany From being a threshold country in the

19th century to becoming the most important nation economically in Western Europe Germany has a history that is not only very interesting but also not all as fancy and sparkling as it seems This paper will give you a short timeline of the key events that happened in the German economic history between 1945 and 1973 that lead to the success of the nation You will see that most of the miracle was made possible only with the help of the United States and that the economic growth was not exclusive to Germany In the end you will find multiple approaches that all do their bit to explain why Germany and other countries in Western Europe were able to get this massive economic boom

The World's Work ,1919

The Liberal Delusion John Marsh,2012 Is western civilisation based on a mistaken understanding of humanity Fundamental to any society is its comprehension of human nature It shapes attitudes and policies on a whole range of issues interpersonal relations child rearing discipline and punishment economics and welfare For millennia western societies were based on the idea that human nature is flawed This was turned upside down 300 years ago during the Enlightenment by writers such as Rousseau who argued that we are born good and later warped by parents and society a liberal view of human nature which is now being challenged by scientific discoveries in the fields of the mind the brain and genetics including the Human Genome evolutionary psychology and anthropology This fundamental change has had profound effects If we are essentially good then

we can safely maximize freedom and abandon morality religion and tradition Many aspects of life have been liberalised sexual behaviour alcohol consumption censorship gambling divorce laws and economic activity Economic liberals thought free markets were rational and good and favoured minimal government interference and light touch regulations This led to the credit crunch and the greatest financial crisis since World War Two Many parents now hesitate to discipline their own children The belief that we are essentially good but corrupted by society has also influenced penal policy Liberals see criminals as victims not as wrongdoers because surely no one would choose to do something wrong This is a world far removed from the self sacrifice and fraternity shown during World War Two It has not brought happiness but rather more alienated individuals The outcome of egalitarian aims or methods has often missed its mark e g in education it has led to the dumbing down of academic standards grade inflation and a decline in social mobility Egalitarian regimes from the French Revolution to the Soviet era have been amongst the most bigoted brutal and bloody in history The drive for greater social justice and fairness must remain an essential objective There is therefore an urgent need to separate out the positive from the negative aspects of liberal thought and practice as otherwise there is the risk of descent into moral anarchy and social disintegration

Evaluating Progress in International Relations Annette Freyberg-Inan,Ewan Harrison,Patrick James,2016-10-04 This edited volume offers a systematic evaluation of how knowledge is produced by scholarly research into International Relations The contributors explore three key questions To what extent is scientific progress and accumulation of knowledge possible What are the different accounts of how this process takes place And what are the dominant critiques of these understandings It is the first publication to survey the full range of perspectives available for evaluating scientific progress as well as dominant critiques of scientism In its second part the volume applies this range of perspectives to the research program on the democratic peace It shows what we gain by accommodating and enabling dialogue among the full range of epistemological approaches The contributors elaborate and defend the epistemological position of sociable pluralism as one that seeks to build bridges between soft positivism critical theory and critical realism The underlying idea is that if the

differences between the various approaches used by different communities of researchers can be understood more clearly this will facilitate meaningful cross cutting communication dialogue and debate and thereby enable us to address real world problems more effectively This timely and original work will be of great interest to advanced level students and scholars dealing with philosophy of science and methodological questions in International Relations
