The Arid Lands Diana K. Davis, 2016-03-25 An argument that the perception of arid lands as wastelands is politically motivated and that these landscapes are variable biodiverse ecosystems whose inhabitants must be empowered Deserts are commonly imagined as barren defiled worthless places wastelands in need of development This understanding has fueled extensive anti desertification efforts a multimillion dollar global campaign driven by perceptions of a looming crisis In this book Diana Davis argues that estimates of desertification have been significantly exaggerated and that deserts and drylands which constitute about 41% of the earth's landmass are actually resilient and biodiverse environments in which a great many indigenous people have long lived sustainably Meanwhile contemporary arid lands development programs and anti desertification efforts have met with little success As Davis explains these environments are not governed by the equilibrium ecological dynamics that apply in most other regions Davis shows that our notion of the arid lands as wastelands derives largely from politically motivated Anglo European colonial assumptions that these regions had been laid waste by traditional uses of the land Unfortunately such assumptions still frequently inform policy Drawing on political ecology and environmental history Davis traces changes in our understanding of deserts from the benign views of the classical era to Christian associations of the desert with sinful activities to later neo colonial assumptions of destruction She further explains how our thinking about deserts is problematically related to our conceptions of forests and desiccation Davis concludes that a new understanding of the arid lands as healthy natural but variable ecosystems that do not necessarily need improvement or development will facilitate a more sustainable future for the world's magnificent drylands

The Empathic Civilization Jeremy Rifkin, 2009-12-31 One of the leading big picture thinkers of our day Utne Reader delivers his boldest work in this erudite tough minded and far reaching manifesto Never has the world seemed so completely united in the form of communication commerce and culture and so savagely torn apart in the form of war financial meltdown global warming and even the migration of diseases No matter how much we put our minds to the task of meeting the challenges of a rapidly globalizing world the human race seems to continually come up short unable to muster the collective mental resources to truly think globally and act locally In his most ambitious book to date bestselling social critic Jeremy Rifkin shows that this disconnect between our vision for the world and our ability to realize that vision lies in the current state of human consciousness The very way our brains are structured disposes us to a way of feeling thinking and acting in the world that is no longer entirely relevant to the new environments we have created for ourselves The human made environment is rapidly

morphing into a global space yet our existing modes of consciousness are structured for earlier eras of history which are just as quickly fading away Humanity Rifkin argues finds itself on the cusp of its greatest experiment to date refashioning human consciousness so that human beings can mutually live and flourish in the new globalizing society In essence this shift in consciousness is based upon reaching out to others But to resist this change in human relations and modes of thinking Rifkin contends would spell ineptness and disaster in facing the new challenges around us As the forces of globalization accelerate deepen and become ever more complex the older faith based and rational forms of consciousness are likely to become stressed and even dangerous as they attempt to navigate a world increasingly beyond their reach and control Indeed the emergence of this empathetic consciousness has implications for the future that will likely be as profound and far reaching as when Enlightenment philosophers upended faith based consciousness with the canon of reason Man's Past and Present Leften Stavros Stavrianos,1975 Rev ed published as A global history 3rd ed c1983 Includes bibliographies and index

the book trade of the United Kingdom Once We All Had Gills Rudolf A. Raff,2012-07-16 In this book Rudolf A Raff reaches out to the scientifically queasy using his life story and his growth as a scientist to illustrate why science matters especially at a time when many Americans are both suspicious of science and hostile to scientific ways of thinking Noting that science has too often been the object of controversy in school curriculums and debates on public policy issues ranging from energy and conservation to stem cell research and climate change Raff argues that when the public is confused or ill informed these issues tend to be decided on religious economic and political grounds that disregard the realities of the natural world Speaking up for science and scientific literacy Raff tells how and why he became an evolutionary biologist and describes some of the vibrant and living science of evolution Once We All Had Gills is also the story of evolution writ large its history how it is studied what it means and why it has become a useful target in a cultural war against rational thought and the idea of a secular religiously tolerant nation Persistent Permeability? Bassel F. Salloukh,2017-03-02 With the collapse of the Middle East peace process the war on terrorism and US led intervention in Iraq the question of Middle East regionalism s has reached a new salience Will such developments usher in a new wave of transnational politics as events reverberate through a Middle East made even more permeable by new information technologies and transregional religious networks Or will authoritarian states successfully insulate themselves from such effects What impact will globalization have on local identities and local politics To what extent might issues of regional permeability be mediated by class gender ethnicity population migration or other factors The contributors to Persistent Permeability address such questions from a variety of analytical perspectives In doing so they offer a valuable contribution essential for all those interested in Middle East politics and international relations Publishers' Circular and Booksellers' Record of British and Foreign Literature ,1903

The ^AIslamic Threat John L. Esposito, 1999-10-07 Are Islam and the West on a collision course From the Ayatollah Khomeini to Saddam Hussein the image of Islam as a militant expansionist and rabidly anti American religion has gripped the minds of Western governments and media But these perceptions John L Esposito writes stem from a long history of mutual distrust criticism and condemnation and are far too simplistic to help us understand one of the most important political issues of our time In this new edition of The Islamic Threat Myth or Reality Esposito places the challenge of Islam in critical perspective Exploring the vitality of this religion as a global force and the history of its relations with the West Esposito demonstrates the diversity of the Islamic resurgence and the mistakes our analysts make in assuming a hostile monolithic Islam This third edition has been expanded to include new material on current affairs in Turkey Afghanistan Palestine and Southeast Asia as well as a discussion of international terrorism

W. E. B. Du Bois' Africa Taharka Ade, 2023-08-15 W E B Du Bois was one of the leading figures of Pan African thought and activism in the twentieth century As a sociologist Du Bois wrote much about the historical and social circumstances of African Americans while often acknowledging the African historical background of much of African American or Negro culture In 1946 Du Bois published The World and Africa which was a culmination of previous attempts at

penning a narrative of African history beginning with his 1915 publication *The Negro* in which he included the social historical experience of African Americans within the continuity of African history. This book delivers for the first time a comprehensive Afrocentric investigation and critique of Du Bois's writings on African history. It argues that while Du Bois presented at the time a strong critique of the Eurocentric construction of African history, many of Du Bois's descriptions and arguments about African people and history were likewise flawed with interpretations that projected the cultural subjectivities of Europe. Further, while Du Bois rightfully presents the historical relationship between African Americans and Africa as a justification for Pan African activism, this book contends that Du Bois's failure to center African culture instead of race leads to superficial justifications for Pan African unity.
