World Development Report 2015 Mind Society And Behavior:

World Development Report 2015 World Bank,2014-12-04 Development economics and policy are due for a redesign In the past few decades research from across the natural and social sciences has provided stunning insight into the way people think and make decisions Whereas the first generation of development policy was based on the assumption that humans make decisions deliberately and independently and on the basis of consistent and self interested preferences recent research shows that decision making rarely proceeds this way People think automatically when deciding they usually draw on what comes to mind effortlessly People also think socially social norms guide much of behavior and many people prefer to cooperate as long as others are doing their share And people think with mental models what they perceive and how they interpret it depend on concepts and worldviews drawn from their societies and from shared histories The World Development Report 2015 offers a concrete look at how these insights apply to development policy It shows how a richer view of human behavior can help achieve development goals in many areas including early childhood development household finance productivity health and climate change It also shows how a more subtle view of human behavior provides new tools for interventions Making even minor adjustments to a decision making context designing interventions based on an understanding of social preferences and exposing individuals to new experiences and ways of thinking may enable people to improve their lives The Report opens exciting new avenues for development work It shows that poverty is not simply a state of material deprivation but also a tax on cognitive resources that affects the quality of decision making It emphasizes that all humans including experts and policy makers are subject to psychological and social influences on thinking and that development organizations could benefit from procedures to improve their own deliberations and decision making It demonstrates the need for more discovery learning and adaptation in policy design and implementation The new approach to development economics has immense promise Its scope of application is vast This Report introduces an important new agenda for the development community

World Development Report 2017 World Bank Group,2017-02-02 Why are carefully designed sensible policies too often not adopted or implemented When they are why do they often fail to generate development outcomes such as security growth and equity And why do some bad policies endure World Development Report 2017 Governance and the Law addresses these fundamental questions which are at the heart of development Policy making and policy implementation do not occur in a vacuum Rather they take place in complex political and social settings in which individuals and groups with unequal power interact within changing rules as they pursue conflicting interests The process of these interactions is what this Report calls governance and the space in which these interactions take place the policy arena The capacity of actors to commit and their willingness to cooperate and coordinate to achieve socially desirable goals are what matter for effectiveness However who bargains who is excluded and what barriers block entry to the policy arena determine the selection and implementation of policies and consequently their impact on development outcomes Exclusion

capture and clientelism are manifestations of power asymmetries that lead to failures to achieve security growth and equity. The distribution of power in society is partly determined by history. Yet there is room for positive change. This Report reveals that governance can mitigate even overcome power asymmetries to bring about more effective policy interventions that achieve sustainable improvements in security growth and equity. This happens by shifting the incentives of those with power, reshaping their preferences in favor of good outcomes and taking into account the interests of previously excluded participants. These changes can come about through bargains among elites and greater citizen engagement as well as by international actors supporting rules that strengthen coalitions for reform.

This important Research Handbook explores the nexus between human rights, poverty and inequality as a critical lens for understanding and addressing key challenges of the coming decades including the objectives set out in the Sustainable Development Goals. The Research Handbook starts from the premise that poverty is not solely an issue of minimum income and explores the profound ways that deprivation and distributive inequality of power and capability relate to economic, social, cultural, civil and political rights.

From Here to Denmark Rajat M. Nag, Harinder S. Kohli, 2023. Here is a hypothetical place where governance is poor, rule of law is not respected and justice is often denied. Many, particularly the poor and the marginalised, suffer daily indignities, big and small, and live a life marked by fear and insecurity. Denmark, on the other hand, is where good governance prevails and is reflected in predictable and accountable actions by others, including the State. The journey From Here to Denmark is essentially a quest of ensuring good governance. Improving governance needs good, strong institutions. Time, history, culture, leadership and yes, luck, all have a role to play in this journey. But the experiences of several countries which have made this transition convincingly point to the overriding importance of human capital and an empowered citizenry who can actively participate in the affairs of their society in building strong institutions.

Developing Minds Elise Klein, 2016-10-04. Development policy makers and practitioners are becoming increasingly sophisticated in their ability to target development interventions and the psychological domain is now a specific frontier of

their interventional focus This landmark study considers the problematic relationship between development and psychology tracing the deployment of psychological knowledge in the production reproduction of power relations within the context of neoliberal development policy and intervention It examines knowledge production and implementation by actors of development policy such as the World Bank and the neo colonial state and ends by examining the proposition of a critical psychology for more emancipatory forms of development The role of psychology in development studies remains a relatively unexplored area with limited scholarship available This important book aims to fill that gap by using critical psychology perspectives to explore the focus of the psychological domain of agency in development interventions It will be essential reading for students researchers and policy makers from fields including critical psychology social psychology development studies and anthropology

The Republic of Beliefs Kaushik Basu, 2020-12-08 This book argues that the traditional economic analysis of the law has significant flaws and has failed to answer certain critical questions satisfactorily Why are good laws drafted but never implemented When laws are unenforced is it a failure of the law or the enforcers And most important considering that laws are simply words on paper why are they effective Basu offers a provocative alternative to how the relationship between economics and real world law enforcement should be understood Basu summarizes standard neoclassical law and economics before looking at the weaknesses underlying the discipline Bringing modern game theory to bear he develops a focal point approach modeling not just the self interested actions of the citizens who must follow laws but also the functionaries of the state the politicians judges and bureaucrats enforcing them He demonstrates the connections between social norms and the law and shows how well conceived ideas can change and benefit human behavior For example bribe givers and takers will collude when they are treated equally under the law And in food support programs vouchers should be given directly to the poor to prevent shop owners from selling subsidized rations on the open market Basu provides a new paradigm for the ways that law and economics interact a framework applicable to both less developed countries and the developed world Jacket

Structural Transformation and Agrarian Change in India Goran Djurfeldt, Srilata Sircar, 2016-10-04 The landlord and his emaciated labourer are symbolic of Indian agriculture However this relationship has now changed as large landowners have fallen from their superior position This volume explores how this emblematic pair is becoming a thing of the past Structural Transformation and Agrarian Change in India investigates whether family labour farms are gaining prominence as a consequence of the structural transformation of the economy The authors work alongside Weberian methodology of ideal types and develop different types of family farms

among them family labour farms that rely mainly on family workers contrasted with capitalist farms that depend on hired labour Agriculture is shrinking as a part of the total GDP at the same time as agricultural labour is shrinking as part of the total labour force The changing agrarian structure is explored with the use of unique long term survey data and statistical models Results show that India is approaching farm structures that are typical of East and South East Asia with pluriactive smallholders as the norm This book successfully criticizes popular narratives about Indian agricultural development as well as simplistic evolutionist Marxist or neoclassical prognoses It is of great importance to those who study development economics development studies and South Asian economics **Behavioral Economics** Philip Corr, Anke Plagnol, 2023-03-31

Stiglitz, 2025-03-27 Joseph E Stiglitz has had a remarkable career He is a brilliant academic capped by sharing the Nobel Memorial Prize in Economics and the Nobel Peace Prize and honorary degrees from Harvard Cambridge Oxford and more than fifty other universities and elected not only to the National Academy of Sciences and the American Academy of Arts and Letters but the Royal Society and the British Academy a public servant who served as Chair of President Clinton s Council of Economic Advisors and Chief Economist and Senior Vice President of the World Bank headed international commissions for the UN and France and was awarded the French Legion of Honor and Australia s Sydney Peace Prize a public intellectual whose numerous books on vital topics have been best sellers What brought him to economics were his concerns about the inequality and discrimination he saw growing up Wanting to understand what drives it and what can be done about it has been his lifelong passion This book gathers together and extends to new frontiers this lifelong work drawing upon the challenges and insights of each of these phases of his career In a still very widely cited paper written fifty

years ago Stiglitz set forth the fundamental framework for analyzing intergenerational transfer of wealth and advantage which plays a central role in persistent inequality That and subsequent work developed most fully here for the first time described today s inequality as a result of centrifugal forces increasing inequality and centripetal forces reducing it In recent decades the centrifugal forces have strengthened the centripetal forces weakened His general theory provides a framework for understanding the marked growth in inequality in recent decades and for devising policies to reduce it A central message is that ever increasing inequality is not inevitable Inequality is in a fundamental sense a choice Stiglitz explains that inequality does not largely arise from differences in savings rates between capitalists and others though that may play a role as Piketty Marx and Kaldor suggest but rather it originates importantly from the rules of the game which have weakened the bargaining power of workers as they have increased the market power of corporations He also explains how monetary authorities have contributed to increasing wealth inequality and how unless something is done about it likely changes in technology such as AI and robotization will make matters worse He describes policies that can simultaneously reduce inequality and improve economic performance
