Churchill,2015-03-27 This volume considers the confluence of World History and historical materialism with the following guiding question in mind given developments in the field of historical materialism concerned with the intersection of race gender labour and class why is it that within the field of World History historical materialism has been marginalized precisely as World History orients toward transnational socio cultural phenomenon micro studies or global histories of networks Answering this question requires thinking in an inter related manner about both the development of World History as a discipline and the place of economic determinism in historical materialism This book takes

the position that historical materialism as applied to the field of World History needs to be more open to the methodological diversity of the materialist tradition and to refuse narrowly deterministic frameworks that have led to marginalization of materialist cultural analysis in studies of global capitalism At the same time World History needs to be more self critical of the methodological diversity it has welcomed through a largely inclusionary framework that allows the material to be considered separately from cultural social and intellectual dimensions of global processes

*Symbol, Pattern and Symmetry*  
Michael Hann, 2013-11-21 *Symbol Pattern and Symmetry* The Cultural Significance of Structure investigates how pattern and symbol has functioned in visual arts exploring how connections and comparisons in geometrical pattern can be made across different cultures and how the significance of these designs has influenced craft throughout history The book features illustrative examples of symbol and pattern from a wide range of historical and cultural contexts from Byzantine Persian and Assyrian design to case studies of Japanese and Chinese patterns Looking at each culture s specific craft style Hann shows how the visual arts are underpinned with a strict geometric structure and argues that understanding these underlying structures enables us to classify and compare data from across cultures and historical periods Richly illustrated with both colour and black and white images and with clear original commentary the book enables students practitioners teachers and researchers to explore the historical and cultural significance of symbol and pattern in craft and design ultimately displaying how a geometrical dialogue in design can be established through history and culture
