s8dyaf8b Podgor, Ellen, Encyclopaedia of the History of Science, Technology, and Medicine in Non-Western Cultures Helaine Selin, 2013-11-11 The Encyclopaedia fills a gap in both the history of science and in cultural studies Reference works on other cultures tend either to omit science completely or pay little attention to it and those on the history of science almost always start with the Greeks with perhaps a mention of the Islamic world as a translator of Greek scientific works The purpose of the Encyclopaedia is to bring together knowledge of many disparate fields in one place and to legitimize the study of other cultures science Our aim is not to claim the superiority of other cultures but to engage in a mutual exchange of ideas The Western academic divisions of science technology and medicine have been united in the Encyclopaedia because in ancient cultures these disciplines were connected This work contributes to redressing the balance in the number of reference works devoted to the study of Western science and encourages awareness of cultural diversity The Encyclopaedia is the first compilation of this sort and it is testimony both to the earlier Eurocentric view of academia as well as to the widened vision

of today There is nothing that crosses disciplinary and geographic boundaries dealing with both scientific and philosophical issues to the extent that this work does xi PERSONAL NOTE FROM THE EDITOR Many years ago I taught African history at a secondary school in Central Africa *Cancer and its Management* Jeffrey S. Tobias, Daniel Hochhauser, 2014-10-03 Now in its seventh edition this highly regarded book is designed as an introductory and reference text on the principles of diagnosis staging and treatment of tumors As for the last 6 editions of the book the aim and scope of the new edition are once again to provide a thorough yet reasonably brief account of the whole field of oncology focusing on the latest principles of cancer management The book is already well established having been first published in 1986 and in continuous print since then The authors are rightfully proud of their strong legacy of providing carefully revised new editions of this standard and well received cancer text for audiences in the UK and abroad Oncology is a very rapidly changing speciality with many new treatments and even treatment modalities coming on stream with bewildering speed Besides a thorough general updating of the text figures and tables the new seventh edition adds a new chapter on Molecular Targeted Therapy making the book 30 chapters in total This accessible and practical resource is invaluable to trainees and specialists alike in oncology palliative care and general medicine as well as specialist nurses general practitioners medical students and professions allied to medicine **Clinical Exercise Physiology** Jonathan K Ehrman, Paul Gordon, Paul Visich, Steven J.
