World History Human Legacy Chapter 13 Review:

An Unnatural History of Religions Leonardo Ambasciano, 2018-12-27 An Unnatural History of Religions examines the origins development and critical issues concerning the history of religion and its relationship with science The book explores the ideological biases logical fallacies and unwarranted beliefs that surround the scientific foundations or lack thereof in the academic discipline of the history of religions positioning them in today's post truth culture Leonardo Ambasciano provides the necessary critical background to evaluate the most important theories and working concepts dedicated to the explanation of the historical developments of religion He covers the most important topics and paradigm shifts in the field such as phenomenology postmodernism and cognitive science These are taken into consideration chronologically each time with case studies on topics such as shamanism gender biases ethnocentrism and biological evolution Ambasciano argues that the roots of post truth may be deep in human biases but that historical justifications change each time resulting in different combinations The surprising rise of once fringe beliefs such as conspiracy theories pseudoscientific claims and so called scientific creationism demonstrates the alarming influence that post truth ideas may exert on both politics and society Recognising them before they spread anew may be the first step towards a scientifically renewed study of religion

The Legacy of Walter Rodney in Guyana and the Caribbean Arnold Gibbons, 2012-07-10 Walter Rodney claimed developing countries were heirs to uneven development and ethnic disequilibrium including continued forms of oppression from the capitalist countries and their own leaders In Guyana ethnic chauvinism persisted before and after independence from Britain Rodney was disturbed by the inability of intellectuals to share common cause with the masses thus ensuring that they would be unable to contribute to uplifting their talents or participate in the growth of the nation Guyana and the Caribbean were subject to sugar and slave traffic that constituted cheap labor for the plantations and buttressed the capitalist industrial system A significant byproduct of that system was the master slave relationship a no less iniquitous consequence was an active racism Thus social inequality became the heritage of Guyanese and Caribbean history These social evils have influenced all of the social economic and political institutions in Guyana Race class and color became the determinants of social value and how the various racial groups responded to them is both the triumph and the tragedy of Guyanese nationalism Rodney belongs in that pantheon of philosophers whose names adorn the history of the Caribbean and elsewhere He has sought to lift the Caribbean people from the victimization of history and the poverty of material circumstance

Identity Politics in George Lucas' Star Wars John C. McDowell, 2016-03-09 George Lucas spoke about the didactic role of cinema and about his own work being presented through the moral megaphone of the film industry A considerable body of scholarship on the six part Star Wars series argues unconvincingly that the franchise promoted neo conservatism in American culture from the late 1970s onward But there is much in Lucas grand space opera to suggest something more ideologically complex is going on This book challenges the view of the saga as an unambiguously violent text exemplifying reactionary politics and discusses the films identity politics with regard to race and gender

Out of Eden: The Peopling of the World Stephen Oppenheimer, 2012-03-01 In a brilliant synthesis of genetic archaeological linguistic and climatic data Oppenheimer challenges current thinking with his claim that there was only one successful migration out of Africa In 1988 Newsweek headlined the startling discovery that everyone alive on the earth today can trace their maternal DNA back to one woman who lived in Africa 150 000 years ago It was thought that modern humans populated the world through a series of migratory waves from their African homeland Now an even more radical view has emerged that the members of just one group are the ancestors of all non Africans now alive and that this group crossed the mouth of the Red Sea a mere 85 000 years ago It means that not only is every person on the planet descended from one African Eve but every non African is related to a more recent Eve from that original migratory group This is a revolutionary new theory about our origins that is both scholarly and entertaining a remarkable account of the kinship of all humans Further details of the findings in this book are presented at www.bradshawfoundation.com/stephenoppenheimer
