D&B Principal International Businesses , 2009 *The North American Auto Industry since NAFTA* Greig Mordue, Dimitry Anastakis, 2024-10-01 The auto sector is North America's most iconic of industries. Since the North American Free Trade Agreement came into existence in 1994, the sector has undergone tremendous change, escalating concerns around climate change, advances in electric and automated vehicles, deindustrialization, reindustrialization, and the rise of low-cost locations as hubs for manufacturing. The North American Auto Industry since NAFTA examines the issues that have preoccupied the development of policy associated with the manufacture of automobiles in North America. The collection addresses the punctuations that have afflicted the industry since NAFTA's implementation, as well as the slower incremental evolutions that have also occurred. Several aspects of automobility and the industry are explored, including but not limited to the Canadian, American, and Mexican automotive sectors and their evolution and interaction under evolving trade regimes. The book analyses issues surrounding labour, technology, trade policy, regional development, the environment, and broader societal impacts of the automobile. It also draws on the expertise of a wide cross-section of industry experts and scholars to provide readers with a deeper understanding of the automotive industry and its central role in North America's economic business and political landscape. **Automotive Daily News** , 1957-07 **Domestic Commerce** United States.
