The Case of Tourism Enterprises Dawid Szutowski,2017-03-18 In contemporary economics only one thing is constant constant change Gunday et al 2011 The

notion of change relates directly to innovation The very nature of innovation constitutes combining existing factors in a new changed way Since the early stage of the scientific investigation of innovation research has focused mainly on the solutions actually implemented Schumpeter 1939 Yet it is only through implementation that the benefits of innovation may materialise The task is not simple The process of obtaining the gains is complex as innovation may pass through different stages Thus for almost half century the scientific community has considered innovation to be a complex process and not just a simple occurrence Myers and Marquis 1969 Innovation pushes progress forward Thus previous scientific investigation limited the concept of innovation to implementations which generate positive effects Nelson and Winter 1982 The above scientific considerations still hold today Moss Kanter 2006 Innovation is of crucial importance for tourism companies which cover accommodation for visitors food and beverage serving activities passenger transportation travel agencies and other reservation activities cultural activities sports and recreational activities and retail trade of country specific tourism characteristic goods UNWTO 2010 It provides them with competitive advantage and hence the firms with market power gain more from innovation Tirole 1995 A firm s innovation interacts with the environment It delivers diverse benefits to the consumers in the form of new products and lower prices which in turn impact positively on the company Shiller 2006 In the context of tourism the ongoing scientific discussion on innovation seems not to have achieved any definite conclusions yet The implementation of innovation in tourism enterprises leads to the achievement of diverse ends From this point of view the measurement of the effects of innovation is of vital importance There are a number of financial measures covering substantially different fields The most comprehensive amongst them is a company s value It covers all the aspects of a company s activity Bodie and Merton 2000 However due to its importance and complexity numerous approaches to company value were created The basic distinction covers book and market value based approaches The proponents of book value assume that the balance sheet yields a reliable estimate of the value of assets and equities However numerous shortcomings emerge the static character dealing with historical figures failing to include intangibles and treating all classes of accounts as having equal importance Nunes 2003 The market value based approach stands for the price that assets would fetch in the marketplace Fabrozi and Drake 2009 The main objective of the research is to measure the short and long term impact of innovation announcements on the market value of equity of tourism enterprises

*The Making of Macau's Fusion Cuisine*  
Annabel Jackson, 2020-03-09

In *The Making of Macau's Fusion Cuisine: From Family Table to World Stage* Annabel Jackson argues that Macanese cuisine cannot be seen as a unique product of Portuguese colonialism in southern China. Instead, it needs to be understood in the context of Portugal's culinary footprint in Asia and beyond. She contends that the culinary cultures of other Portuguese colonies in Asia and Africa also influenced the cuisine in Macau. Macanese cuisine plays a role in evoking a sense of Macanese identity within Macau as well as in the Macanese diaspora. As the Macanese have increasingly defined themselves as an ethnically and culturally distinct group, their cuisine has growingly been seen as a critical identifier of cohesion and difference. The book shows how Macanese cuisine is moving from being an everyday production of food in a domestic setting to something more symbolic and ceremonial. It also argues that the practice of recipe sharing, historically controversial among the Macanese, is now viewed as an important process. Drawing on information gathered through interviews and surveys, the book is a fascinating study of the history and development of Macanese cuisine, one of the oldest fusion cuisines in Asia. Annabel Jackson has more than enough knowledge to share with the readers many insights and interesting stories which are embedded in history and cultural interactions among various ethnic groups in Macau and beyond. Given the fact that Macau has become the city of gastronomy, this book brings in rich information and knowledge for locals and visitors to taste and to remember. Sidney Cheung, The Chinese University of Hong Kong

Annabel Jackson's study of the development of Macanese cuisine and its role in evoking a sense of Macanese identity within Macau and the Macanese diaspora should contribute to the growing interest in the study of food and foodways within cultural and postcolonial studies. Written in a lively and engaging way, it achieves a good balance between the use of primary sources and theoretical
