World Development Report Equity And Development:

World Development Report 2006 World Bank, World Bank Group, 2005-09 Inequality of opportunity both within and among nations sustains extreme deprivation results in wasted human potential and often weakens prospects for overall prosperity and economic growth concludes the 2006 World Development Report To correct this situation and reduce poverty more effectively Equity and Development recommends ensuring more equitable access by the poor to health care education jobs capital and secure land rights among others It also calls for greater equality of access to political freedoms and political power breaking down stereotyping and discrimination and improving access by the poor to justice systems and infrastructure To level the playing field among countries and thereby reduce global inequities that hurt the poor in developing countries the report calls for removal of trade barriers in rich countries flexibility to allow greater in migration of lower skilled people from developing countries and increased and more effective development assistance World Development Report 2006

Francisco H. G. Ferreira, Michael Walton, 2005-01-01 Inequality of opportunity both within and among nations sustains extreme deprivation results in wasted human potential and often weakens prospects for overall prosperity and economic growth concludes the 2006 World Development Report To correct this situation and reduce poverty more effectively Equity and Development recommends ensuring more equitable access by the poor to health care education jobs capital and secure land rights among others It also calls for greater equality of access to political freedoms and political power breaking down stereotyping and discrimination and improving access by the poor to justice systems and infrastructure To level the playing field among countries and thereby reduce global inequities that hurt the poor in developing countries the report calls for removal of trade barriers in rich countries flexibility to allow greater in migration of lower skilled people from developing countries and increased and more effective development assistance **World Development Report 2012** The International Bank for Reconstruction and Development / The World Bank The International Bank for Reconstruction and Development / The World Bank, 2011-09-28 The lives of women around the world have improved dramatically at a pace and scope difficult to imagine even 25 years ago Women have made unprecedented gains in rights education health and access to jobs and livelihoods More countries than ever guarantee equal rights in property marriage and other domains Gender gaps in primary schooling have closed in many countries while in a third of all countries girls now outnumber boys in secondary school And more young women than men attend universities in 60 countries Women are using their education to participate more in the labor force they now make up for 40 percent of the global labor force and 43 percent of its farmers Moreover women now live longer than men in every region of the world Despite the progress gaps remain in many areas Women are more likely to die relative to males in many low and middle income countries than their counterparts in rich countries especially in childhood and during their reproductive years Primary and secondary school enrollments for girls remain much lower than for boys in many Sub Saharan African countries and some parts of South Asia as well as among disadvantaged

populations Women are more likely than men to work as unpaid family laborers or in the informal sector to farm smaller plots and grow less profitable crops operate in smaller firms and less profitable sectors and generally earn less Women especially poor women have less say over decisions and less control over household resources And in most countries fewer women participate in formal politics than men and are underrepresented in the upper echelons The World Development Report 2012 Gender Equality and Development argues that closing these persistent gender gaps matters It matters because gender equality is a core development objective in its own right But it is also smart economics Greater gender equality can enhance productivity improve development outcomes for the next generation and make institutions more representative Building on a growing body of knowledge on the economics of gender equality and development the Report identifies the areas where gender gaps are most significant both intrinsically and in terms of their potential development payoff and where growth alone cannot solve the issues It then sets forth four priorities for public action Reducing excess female mortality and closing education gaps where they remain Improving access to economic opportunities for women Increasing women's voice and agency in the household and in society Limiting the reproduction of gender inequality across generations

World Development Report 2012 World Bank, 2011-09-01 This year's World Development Report looks at facts and trends regarding the various dimensions of gender equality in the context of the development process

Towards Gender Equity in Development Siwan Anderson, Lori Beaman, Jean-Philippe Platteau, 2018-10-22 As a result of widespread mistreatment and overt discrimination women in the developing world often lack autonomy Towards Gender Equity in Development brings together leading scholars working on gender issues to explore key sources of female empowerment and discuss the current challenges and opportunities for the future Exploring three key domains this book

adopts a clear multi disciplinary approach to present different perspectives from gender focused economics and social research It covers marriage and women s relative bargaining position within the household the options available to women outside of marriage and in the context of their community and overarching discriminatory laws and cultural norms It engages with questions of how marriage divorce and remarriage practices have evolved and with what effects for women how female empowerment can benefit from improving options and economic and collective action opportunities and how the government can act as a lawmaker to contribute to modifying norms and practices that disadvantage women

The Politics of Global Competitiveness Paul Cammack,2022 Marx predicted in Capital 1867 that as capitalism became global patterns of work would be transformed and workers would need to develop versatility flexibility and mobility This general law of social production as he called it is now in evidence all around us in global value chains zero hours contracts and contract work organised through digital platforms It results from competition between capitalists scientific and technological revolutions in production and incessant advances in the division of labour as production processes are broken down into ever smaller steps This book documents the leading roles of the Paris based Organisation for Economic Cooperation and Development and the Washington based World Bank as advocates of these developments They do not as generally supposed simply represent the interests of the advanced economies or the West and their transnational corporations They promote a single global model of capitalist development without limits and on a genuinely global scale It calls upon all states to adjust continually to the structural and social demands of competitiveness which they see as essential to the global hegemony of capital over labour The OECD and the World Bank propose policies that give girls and women equal access to education and paid work reform welfare to make work pay introduce flexible labour contracts that make hiring and firing easier focus education on skills that boost employability and draw workers in the developing world from the informal sector into the formal sector where they can be more productive This is the politics of global competitiveness

The MDGs, Capabilities and Human Rights Sakiko Fukuda-Parr,Alicia Yamin,2017-10-02 Heralded as opening a new chapter in international development the Millennium Development Goals MDGs have led to the use of global goals and quantitative targets as a central instrument for defining global priorities This book explores the implications of this new approach How does target setting influence policy priorities of national governments bilateral donors multilateral agencies NGOs and other stakeholders What are the intended and unintended consequences Why is the use of numeric indicators effective How does quantification reshape meanings of challenges such as women s empowerment Building on 11 case studies and a conceptual framework this book provides a goal by goal analysis by leading specialists in the relevant fields These specialists analyse the choices made as well as the empirical and normative effects of the MDGs to offer insights for a more rigorous use of indicators and cautions on their limitations and perverse consequences This book was originally published as a special issue of the Journal of Human Development and Capabilities
