Juarrero, 2023-06-20 From the influential author of *Dynamics in Action* how the concepts of constraints provide a way to rethink relationships opening the way to intentional meaningful causation Grounding her work in the problem of causation Alicia Juarrero challenges previously held beliefs that only forceful impacts are causes Constraints she claims bring about effects as well and they enable the emergence of coherence In *Context Changes Everything* Juarrero shows that coherence is induced by enabling constraints not forceful causes and that the resulting coherence is then maintained by constitutive constraints Constitutive constraints in turn become governing constraints that regulate and modulate the way coherent entities behave Using the tools of complexity science she offers a rigorously scientific understanding of identity hierarchy and top down causation and in so doing presents a new way of thinking about the natural world Juarrero argues that personal identity which has been thought to be conferred through internal traits essential natures is grounded in dynamic interdependencies that keep coherent structures whole This challenges our ideas of identity as well as the notion that stability means inflexible rigidity On the contrary stable entities are brittle and cannot persist Complexity science says Juarrero can shape how we meet the world how what emerges from our interactions finds coherence and how humans can shape identities that are robust and resilient This framework has significant implications for sociology economics political theory business and knowledge management as well as psychology religion and theology It points to a more expansive and synthetic philosophy about who we are and about the coherence of living and nonliving things alike [Ethnicity in Ancient](#)

the cutting edge of psychotherapeutic theory and practice It is but the major concepts of body mind treatment are actually drawn from a wide range of historical material material that spans centuries and continents Here in a massively comprehensive book Michael Heller summarizes all the major concepts thinkers and movements whose work has led to the creation of the field we now know as body mind psychotherapy The book covers everything from Eastern and Western thought beginning with yoga and Taosim and moving to Plato and Descartes It also discusses major developments in biology how organisms are defined and neuroscience This is truly a comprehensive reference for anyone interested in the origins of the idea that the mind and body are not separate and that both must be understood together in order to understand people and their behavior
